

Travelling

People all over the world adore travelling.

People travel to see new countries and cities, have a rest, to make new friends, to practice foreign language, to taste new food.

**Some people like visiting
big cities.**

**They go to the museums,
art galleries, go shopping.**

Some people prefer quiet holidays by the sea, or in the mountains with nothing to do but walk, swim, and lay in the sun .

**Some people travel abroad
and some around their
country.**

**People live in different places
and they have developed
different kinds of transport.**

Camels are ideal for travelling across the desert.

**They can survive for a week
or more without food.**

**They can carry heavy loads
and their feet do not sink
into the sand.**

**Their milk is good to
drink and it is full of
vitamins.**

People in Venice travel by motorized waterbuses or private boats.

There are no cars or trucks, as the city was built on 118 islands.

**People can travel by ship,
airplane, train, or car.**

When you travel you need a passport, a ticket, a suitcase or a rucksack.

**Some people take a
camera to take
pictures.**

**When you travel by car you
don't have to buy tickets
and carry your heavy
luggage.**

**You can stop at any place,
enjoy the beauty of
nature.**

Travelling by airplane is fast, but expensive.

Travelling by train is very popular. Trains have comfortable seats and carriages.

Tastes are different. But I'm sure everybody likes to travel because it is an amazing experience.
