

# Royal British family

- The British royal family is a group of close relatives of the monarch of Great Britain.
- In the UK there is no clear legal or formal definition of a member of the royal family, as a rule, members of the royal family are: the monarch, the spouse of the monarch, the widowed spouse of the monarch, the children of the monarch, the grandchildren of the monarch on the male side, the spouses and widowed spouses of sons and grandsons on the male side of the monarch.

- Historically, members of the British royal family represented the monarch throughout the British Empire and held responsible and representative posts, today they perform ceremonial and social functions both in the UK and abroad, and in addition to the monarch, they have no constitutional role in government affairs.

# Some facts

- Members of the royal family must be prepared for anything. And the death of one of the relatives is no exception. Therefore, on any, even the shortest, trip, they take mourning clothes with them. Very young princes and princesses, this rule also applies. Royal children travel in full readiness, like all adult family members.

- Royal family members must not travel together aboard a single vehicle. All so that in the event of a tragedy, the British crown would not be left without an heir. However, recently the implementation of this rule has not been monitored so tightly. There are many photos on the network in which Prince William travels with his family. Perhaps this is because he and his children are not the only heirs to the British throne.
