Divergent

In a dystopian Chicago of the future there is a society whose members came up with a way to avoid conflicts and to maintain around the immutable order. Every person upon reaching the age of 16 must determine where his heart is, and depending on their personal qualities to join one of five factions – Sincerity, Courage, Knowledge, Friendliness or Detachment. In order not to be mistaken with the faction before the choosing ceremony the teenagers are tested. Young Beatrice is a threat to the entire existing system, when tests reveal her divergent – a person who is not clearly one of the factions..

The plot

Divergent - one of my favorite movies, it was the first part. I watched this film a few times! It seems to me, it's all about the thrilling story. History, referred to in the movie, begins with the life of a young, at first glance, timid girl. She has to undergo the rite of the distribution of the factions that will determine her place in life. From the first minutes of the film, the writers show how the girl is difficult to make a choice! She doesn't want to belong to any one faction. The main character of the strip wants to be smart and fearless, kind and honest this is a feature of divergent. The whole picture is a short period for which the "miserable" revealed himself and saved the whole faction. It's a pity parents died. They gave their life to save the daughter and the entire faction as a whole! Great movie!

An aerial view of a city at sunset. A large Ferris wheel is the central focus, with its spokes radiating outwards. The sky is a mix of orange, yellow, and blue, with the sun low on the horizon. Numerous small, dark, rectangular objects are falling from the sky, resembling confetti or digital particles. The city below is filled with tall buildings and structures, some of which are illuminated by the setting sun.
