

The background of the slide is a photograph of a rural landscape. In the upper left, a wooden building with a brown roof and a small tower is visible. The middle ground is a vast green field. In the foreground, there are yellow wildflowers and a birch tree trunk on the right side. The text is overlaid on a semi-transparent green octagonal shape.

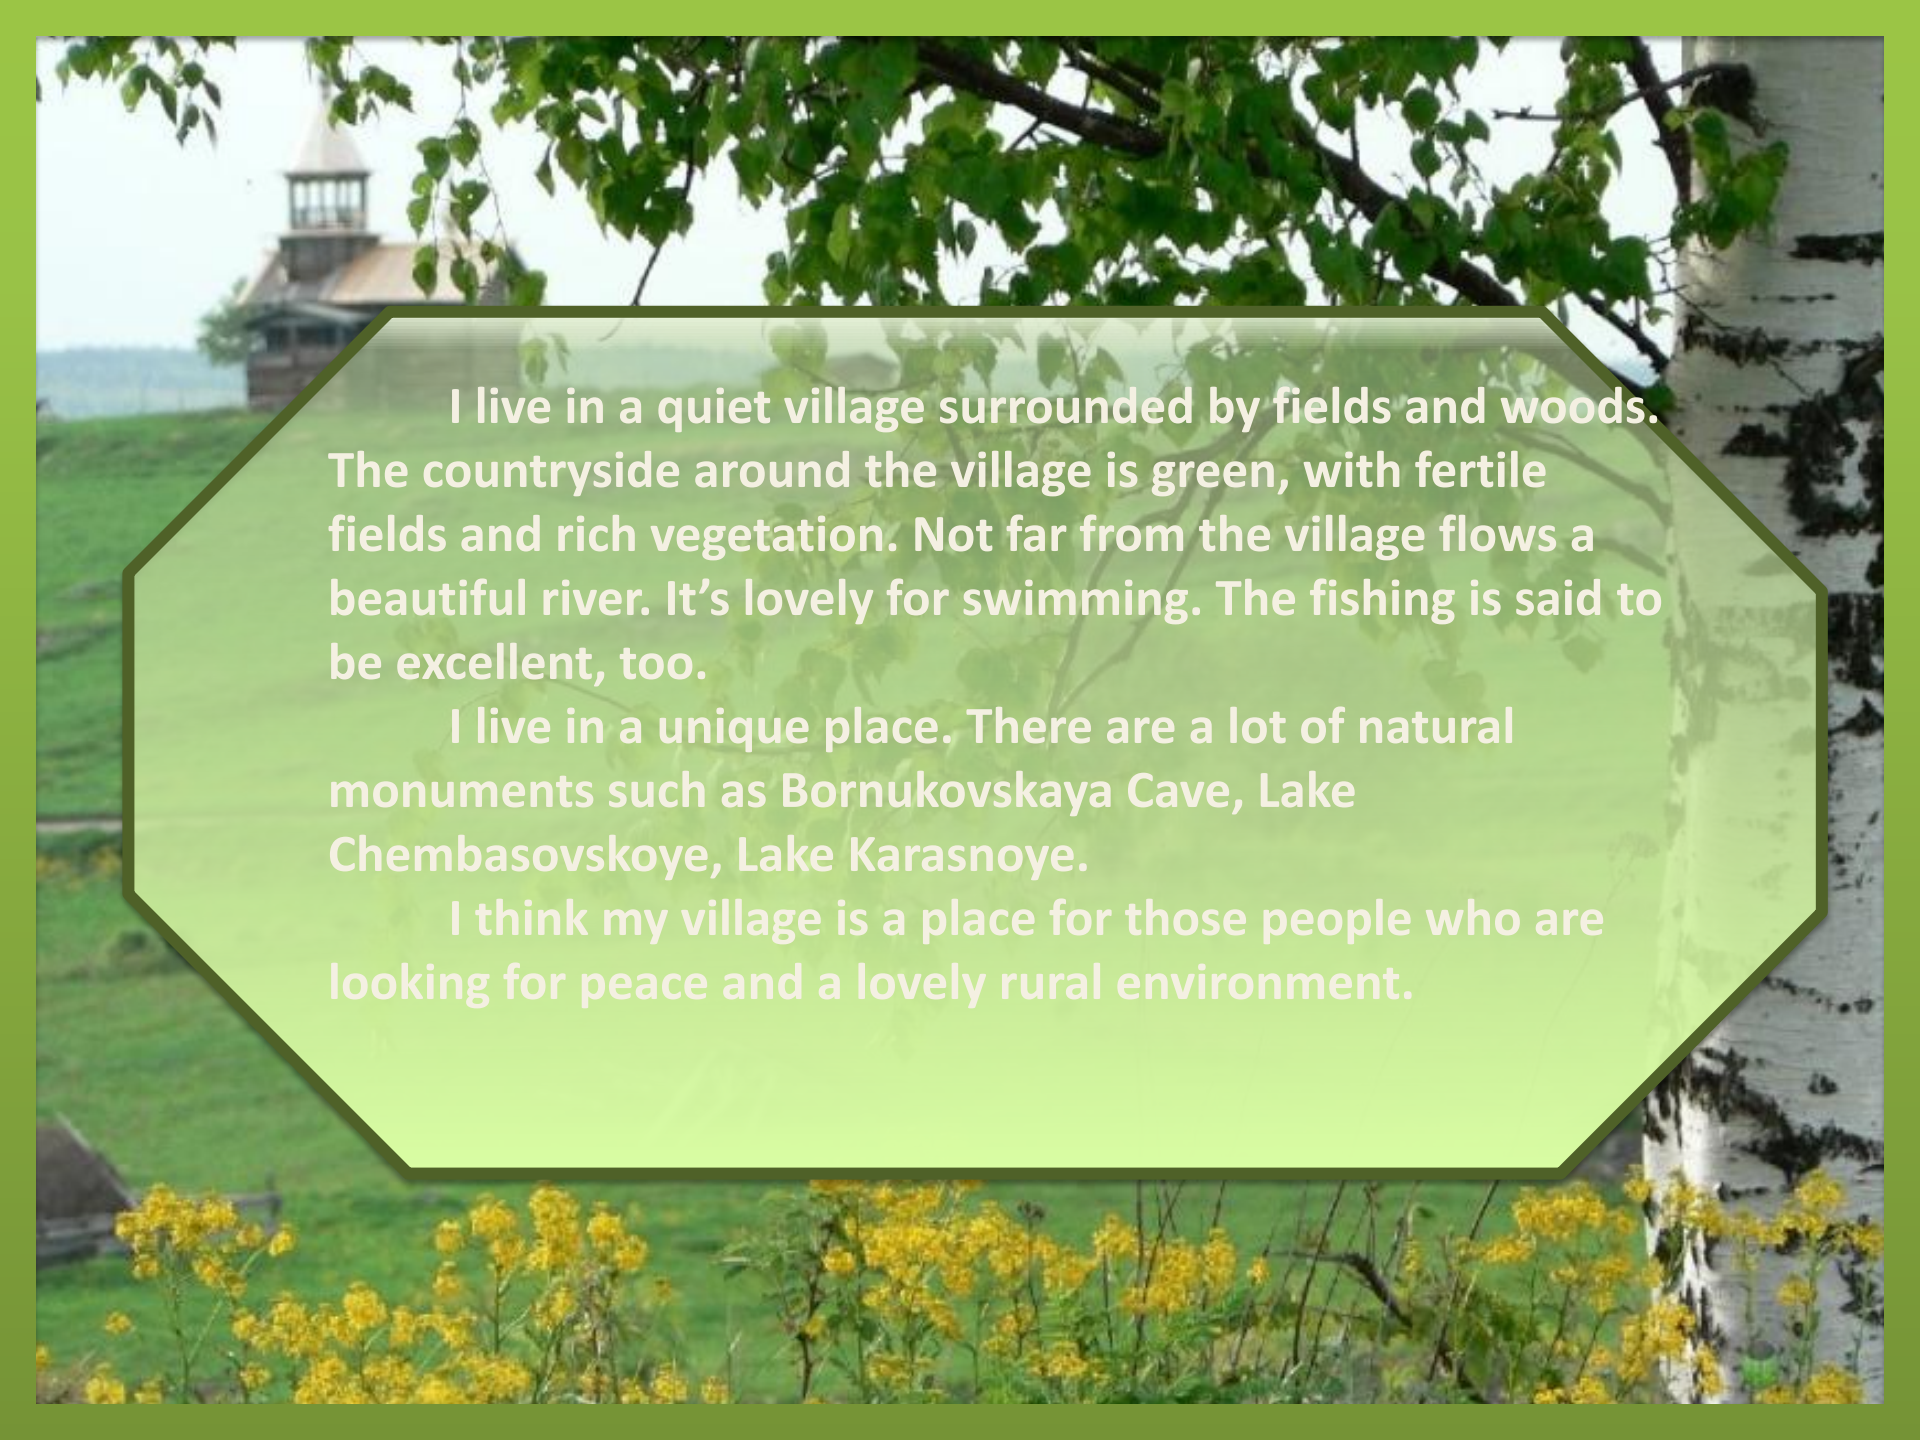

Take care of nature of your place

**Малыгина Александра

СОШ Бутурлинского муниципального
района
Нижегородской области**

The background image shows a rural landscape. In the upper left, a wooden building with a small tower or cupola is visible. The middle ground is a vast, green field. In the foreground, there are several tall stalks of yellow flowers. On the right side, a tree trunk with white bark and dark lenticels is partially visible. A large, semi-transparent green octagon is superimposed over the center of the image, containing the text.

**Nature – the only book where every
page is full of deep content.**

By Goethe

The background image shows a peaceful rural landscape. In the upper left, a wooden church with a brown roof and a small tower is visible. The foreground is dominated by a large, vibrant green octagonal text box. To the right, a white birch tree trunk with characteristic black lenticels is partially visible. The bottom of the image features a field of bright yellow flowers, likely rapeseed, in full bloom. The overall scene is lush and green, suggesting a fertile and beautiful countryside.

I live in a quiet village surrounded by fields and woods. The countryside around the village is green, with fertile fields and rich vegetation. Not far from the village flows a beautiful river. It's lovely for swimming. The fishing is said to be excellent, too.

I live in a unique place. There are a lot of natural monuments such as Bornukovskaya Cave, Lake Chembasovskoye, Lake Karasnoye.

I think my village is a place for those people who are looking for peace and a lovely rural environment.

**Every season has its fine days and is pleasant in its own way.
And it is not difficult to see this beauty.**

**When spring is here, the
world is new**

18/05/2013 06:13 PM

**The grass is green, the
sky is blue.**

11/05/2013 04:06 PM

**When summer comes, it's very hot;
We can play and swim a lot**

Autumn is the season of the harvest, the season of apples

Our native land is rich in berries and mushrooms

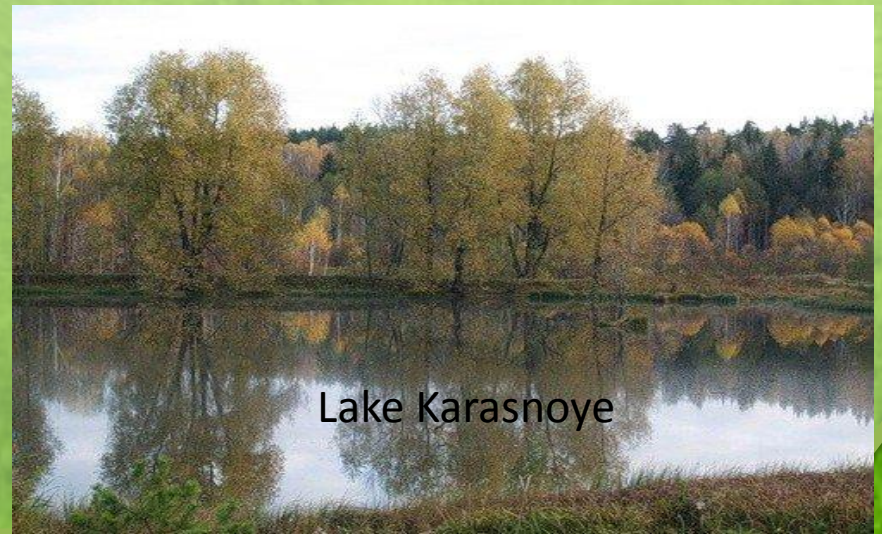

**My native land in winter.
What a beautiful sight!**

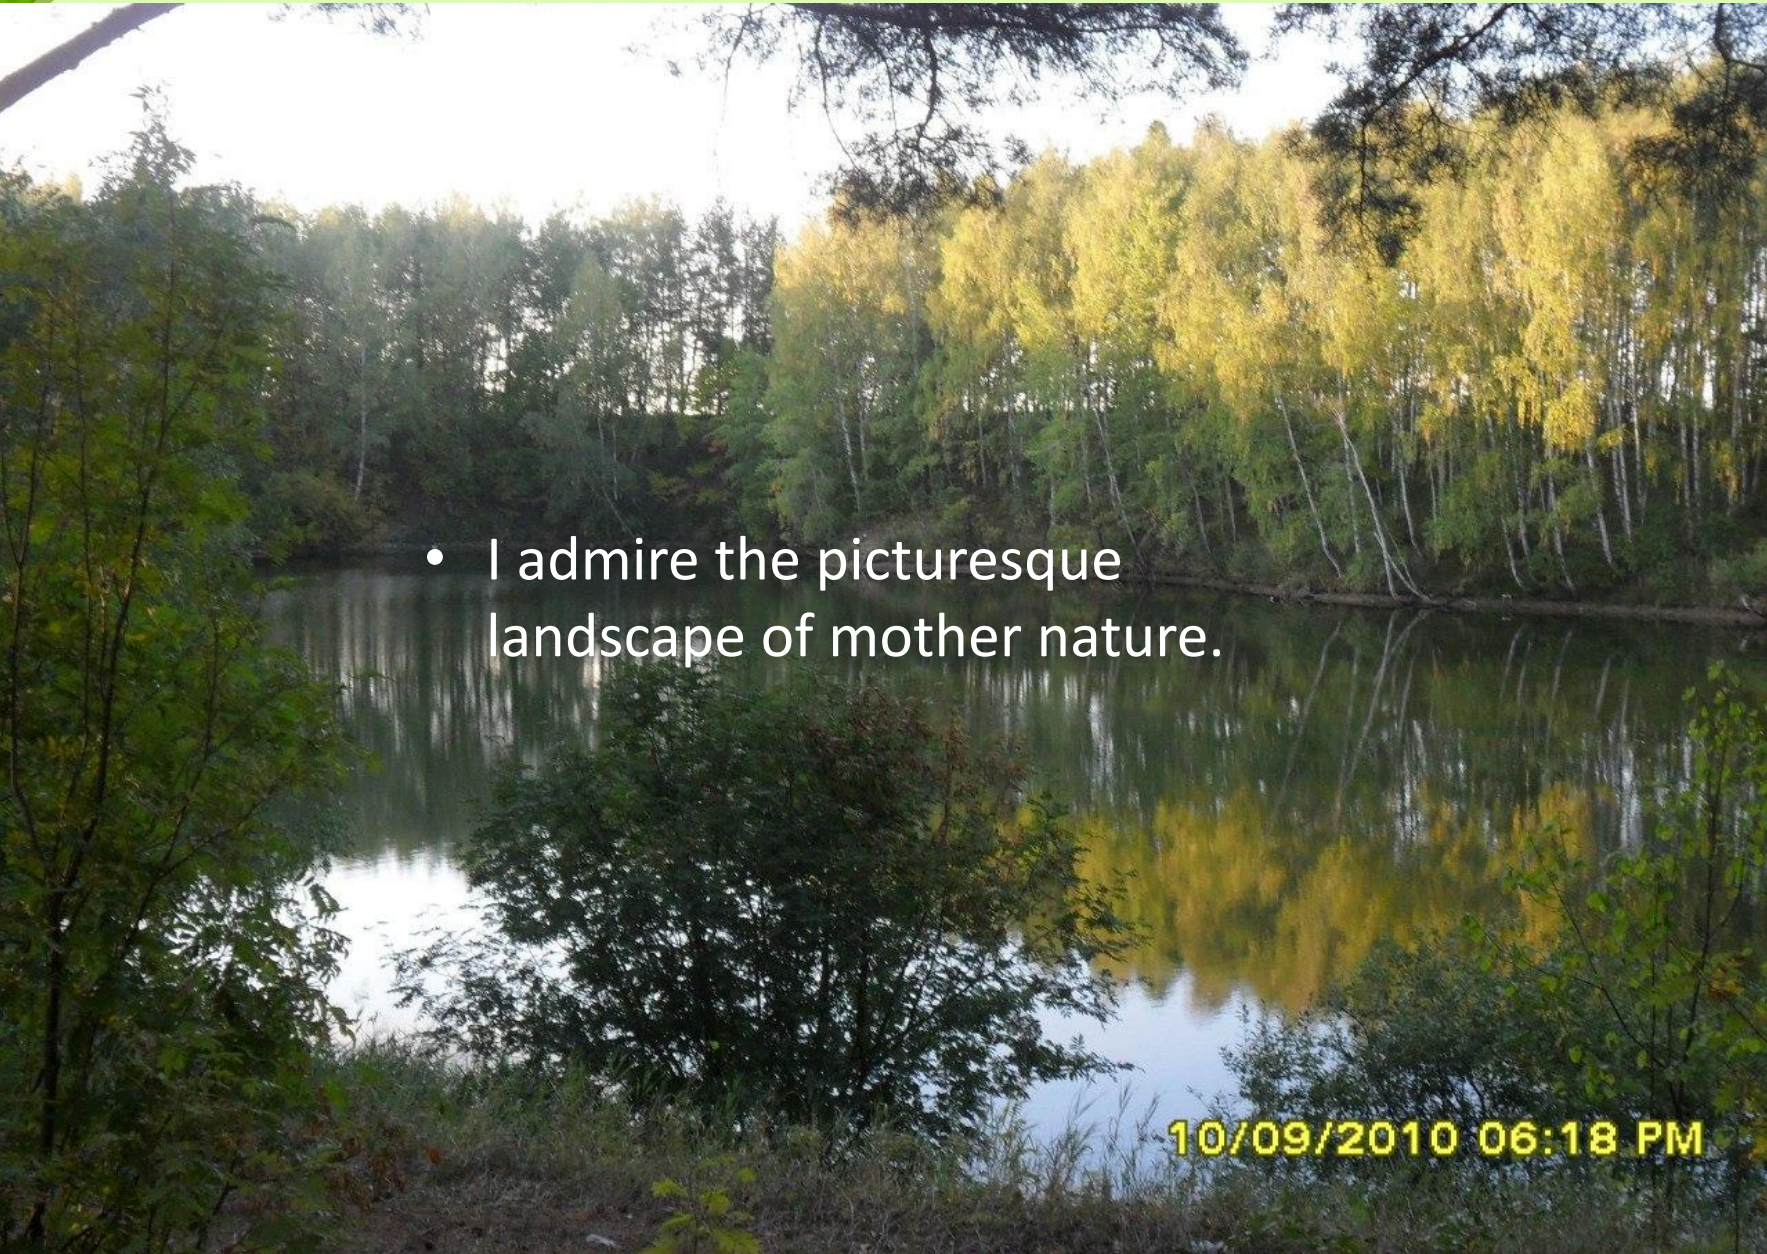

23/02/2013 02:43 PM

**Our land is rich in forests, rivers, lakes, fields and meadows.
We want to see blue rivers, green trees, and clear sky.**

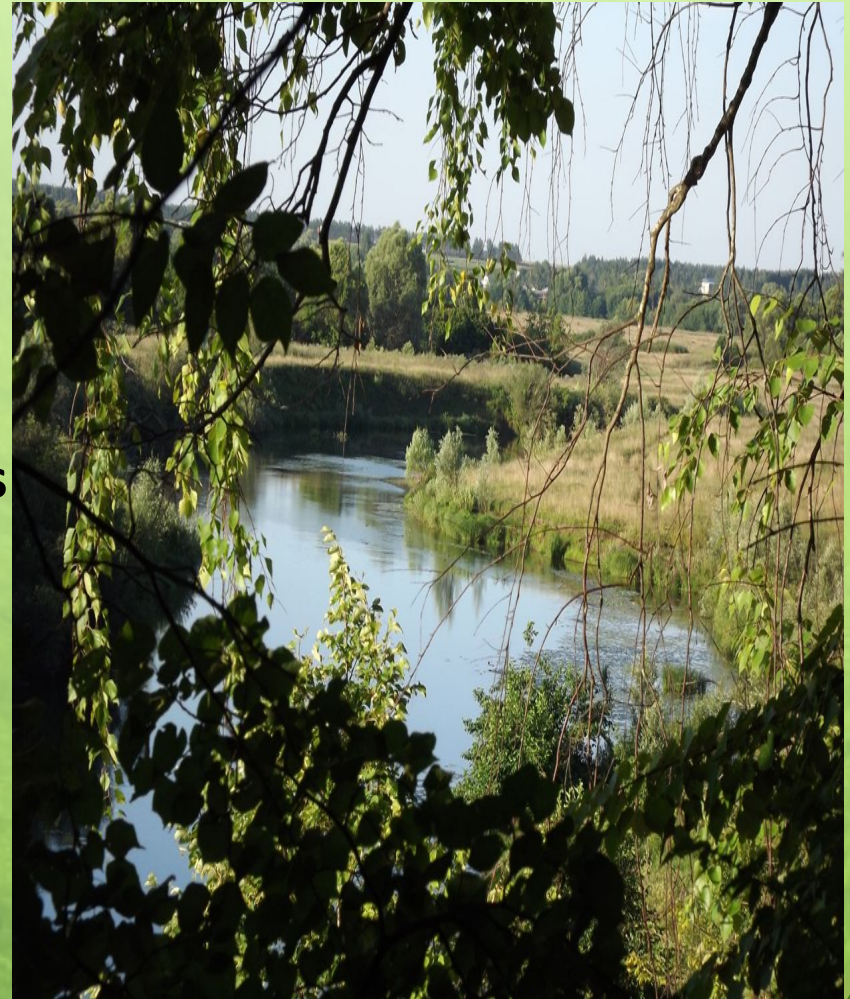

- 
- I admire the picturesque landscape of mother nature.

The Pyana

- This is a very peculiar river of the region, it is extremely tortuous. The river is 436 km long. It is the tributary of the Sura River. River banks contain numerous karst caves. Pyana is remarkable by its shape: it runs to the north-west and then turns 180° south-east making a nearly closed loop before turning north and merging with the Sura.
- The river flows through eight southern districts of the region. The basin area of the river more than 8 thousand sq. km.

Lake Karasnoye

- **Unique monument of nature. The lake is irregular in shape, with a rugged coastline, with an area of 36 hectares. It has a unique coastal and aquatic vegetation, rare wildlife.**

- **In the lake it is found several species of fish, especially it is rich in carp, hence.**

Bornukovskaya Cave

Near the village of Bornukovo there is a natural monument Bornukovskaya Cave.

The cave is composed mostly of sulfate and carbonate rocks.

There is a stone – cutting factory in the village.

Lake Chembasovskoye

- Lake Chembasovskoye is a natural monument.
- It is located near the village of Chembasovo.
- The surface area is 37 hectares.
- Rare aquatic and semi-aquatic birds are nested on the lake.

Animal's world

Our native land's fauna is extremely rich, numbering great amounts of various mammals species, species of birds and fishes

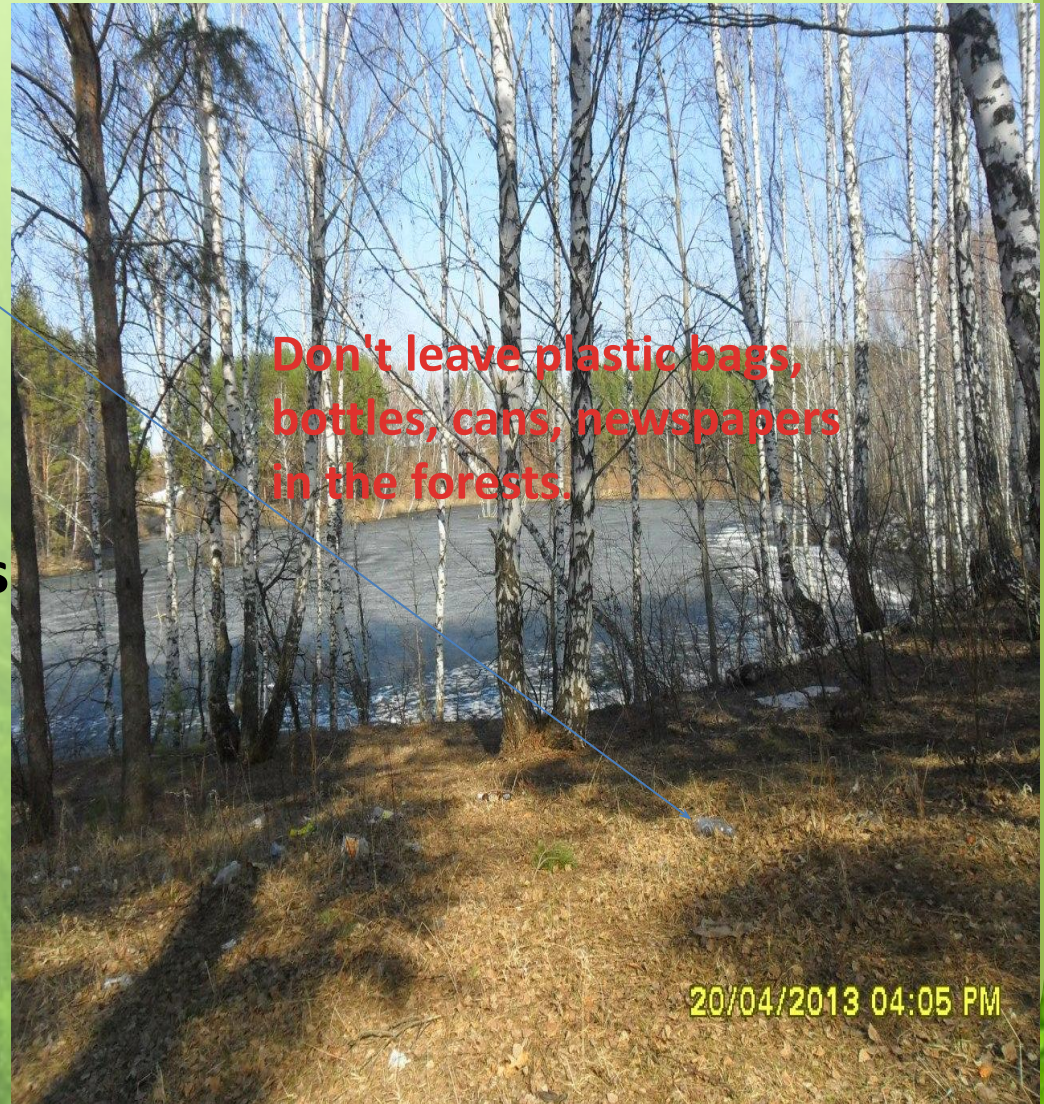

Don't cut wild flowers!

Many people like to pick up wild flowers. But the problem is that they may all disappear.

If you care about your planet, don't make it dirty

- If you throw a glass bottle on the ground it will litter the Earth forever. Aluminum cans and plastic bottles last up to 500 years. Tin cans last 100 years.
- Litter is not only ugly, but it can be harmful to wild life. Small animals can get hurt on sharp cans or broken bottles.

Don't leave plastic bags, bottles, cans, newspapers in the forests.

20/04/2013 04:05 PM

We want our home to be clean and beautiful.

**Every year we take part in Cleaning Day
We rake leaves, collect the garbage.**

**Pick up the litter if you
see it**

The environment is all the things we need to be able to live - clean water to drink , air to breathe and healthy food to eat.

We can't live without plants and animals. They help to make the soil, they clean the water and air, and they give us all our food.

Remember that the future is in our hands.

- English writer John Galsworthy said:” If you don’t think about the future you will not have it”

- Презентацию выполнила Малыгина Александра, ученица 8 класса МБОУ Ягубовской СОШ
- Руководитель – Рыбина Ю.В., учитель английского языка I квалификационной категории МБОУ Ягубовской СОШ
- Консультант – Верховлетова Т.П., завуч МБОУ Ягубовской СОШ
- В презентации использованы фотографии из семейного альбома семьи Малыгиных
- Для музыкального сопровождения использована мелодия Yiruma – Kiss the Rain (from the yellow room)

Thank you for your
attention!
