Nowadays, a lot of children have hobbies: dancing, reading, sport, singing, but not always we have enough time for them.

Some people go to special clubs and sport centers, others spend their free time watching TV, playing computer games, chatting with friends. Hobbies differ like tastes. Fortunately, you can always choose interesting hobby for yourself.

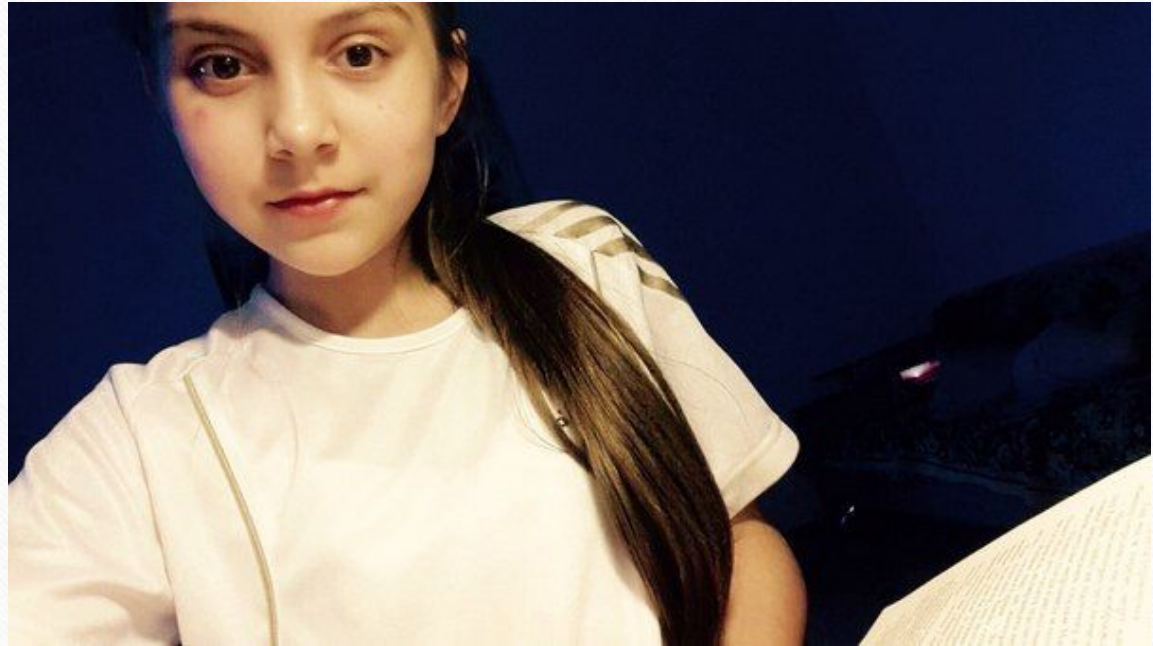

**As a result of our work,
we found out that many
people have their
hobbies.**

Books play a very important role in everyone's life. A book has not only an educational role. I believe that when we read books, we develop our imagination.

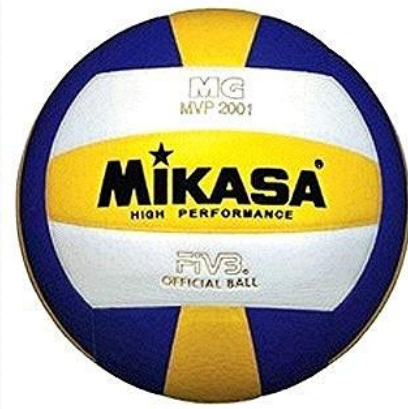

I enjoy reading books by Gail Foreman, John Green, Kolez Susan and Veronica Roth. They wrote a lot of very interesting books, such as "The Hunger Games", "If I stay," "The Fault in Our Stars", "Divergent" and many others.

All in all, I like spending time reading good literature and I can't imagine my life without books.

My hobby is sport, but best of all, volleyball. I like it very much. On the one hand, I can develop my physical abilities. On the other hand, I can find a lot of friends.

I have been
playing volleyball
for two years.

In future, I want to achieve the same success in volleyball as the best players - Obmochaeva and Gamova.

My volleyball team won many different regional and national competitions. I am proud of my team!

In conclusion, we would like to say that hobby is a good way to make our life interesting and it helps to develop our individuality.

The end.
Thank you for your
attention.
