Ковалева Наталья Николаевна

What now represent technologies?

*50 years ago people didn't even heard of computers,
and today we cannot imagine our life without them*

The first computer was the size of a minibus and weighed a ton. Today, its job can be done by a chip the size of a pin head

The next generation of computers will be able to talk and even think

. They will contain electronic "neural networks".. Such computers will help to diagnose illnesses, find minerals, identify criminals and control space travel.

© Long Hongtao / Rex Features

The first computer was the size of a minibus and weighed a ton.

".. Such computers will help to diagnose illnesses, find minerals, identify criminals and control space travel. One-line shopping makes it possible to find exfkty. Emeil is a great invention too.

All in all, I strongly believe that computers are a useful .

They save a lot of time. They seldom make mistakes. It's much faster and easier to surf the Internet than to go to the library

Some people say that computers are dangerous, but I don't agree with them.

iPhone ^{NEXT} G
NEXT GENERATION CONCEPT

*All in
all, I
strongly
believe
that
comput
ers are a
useful
too*

They have changed our life for the better. So why shouldn't we make them work to our advantage

Internet has The Intealready entered our ordinary life. Everybody knows that the Internet is a global computer network, which embraces hundred of millions of users all over the world and helps us to communicate with each other.

The Internet has already entered our ordinary life. Everybody knows that the Internet is a global computer network, which embraces hundred of millions of users all over the world and helps us to communicate with each other

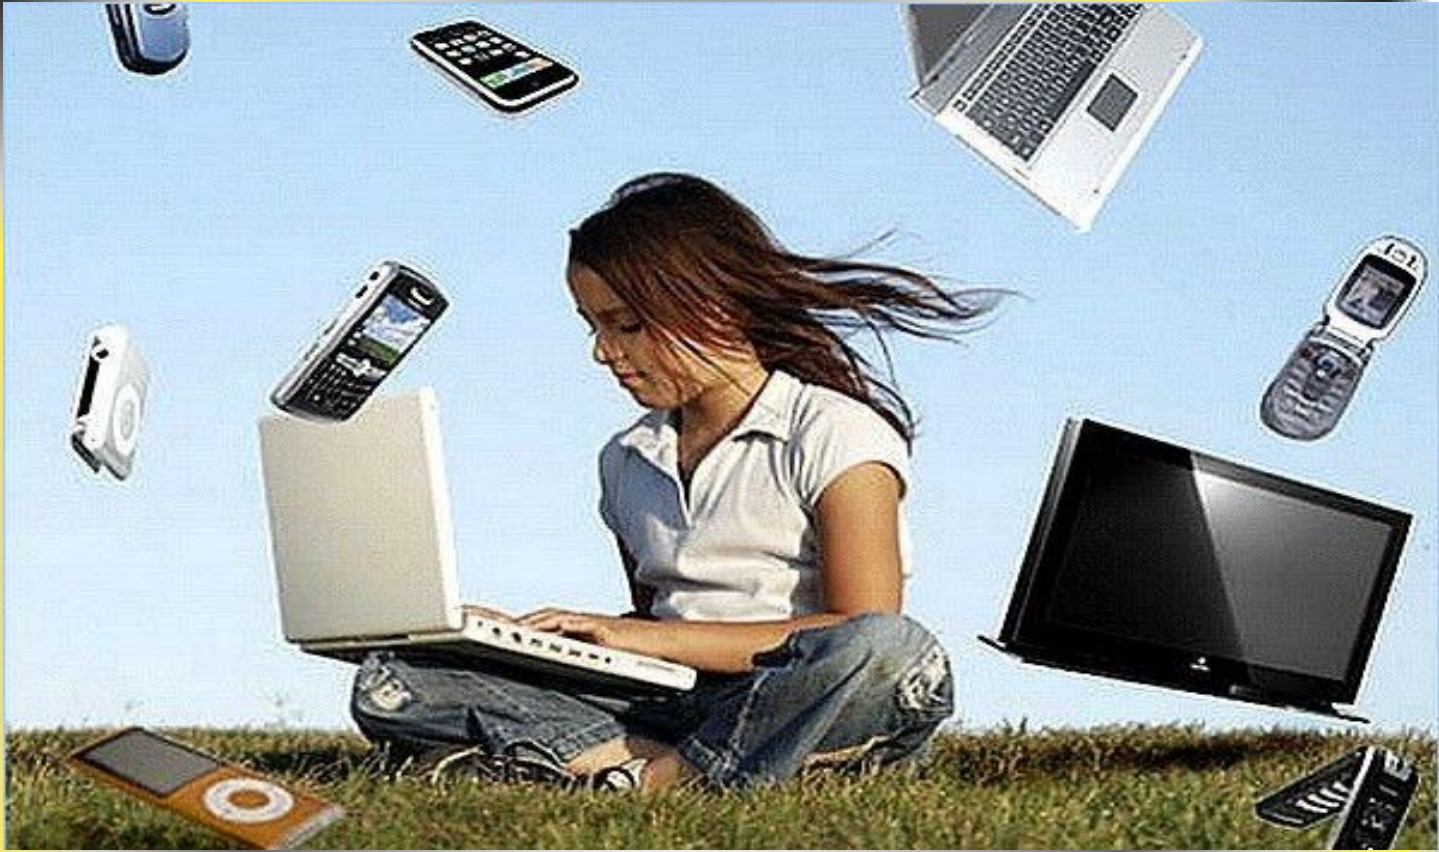

In the internet clubs or at work. Other popular services are available on the Internet too.

Other can do it either they are at home popular services are available on the Internet too.

*In the future, the situation might change, but now we have what we have. It could be expressed in two words—
an anarchist's dream.*

My favourite gadget is the computer. It can help me in different situations. When I do my homework I use it to find different information on different subjects. I regularly listen to news and learn weather forecast. I send e-mails to my friends and get e-mails from them. Sometimes I listen to music on my favourite site Youtube or watch a film on the internet. And finally when I have some free time I play computer games. So it can help us both, to educate and to relax.
