104 500

Bring down:

1

A pink candy character holding a power-up icon that shows a red apple and two cherries, with a '1' indicating its value.

Arcade Games

Games are dangerous from viruses

What is good in computer games

Computer games develop memory, because when you play it you try to remember all details. So, it develops logical thinking, language and basic computer skills.

What is bad in computer games

At the same time, computer games have a harmful effect on health. First of all, you can spoil your eye sight. Besides, you sit in the same place and don't move so you can gain weight. Another point to be made is that a lot of games have aggressive moments and this makes teenagers cruel and causes violent behavior.
