A satellite-style map of North America, showing the continent in shades of green and brown, surrounded by the dark blue oceans. A semi-transparent light blue rectangular box is overlaid on the northern part of the continent, containing text. The text describes Canada's geographical location and its impact on its climate and nature.

Canada is situated in the northern part of the North American continent. It is washed by the Pacific Ocean in the west, by the Atlantic Ocean in the east and by the Arctic Ocean and its seas in the north. That is why the climate and the nature of Canada are much varied.

The region of the Cordilleras is famous for its beautiful forests. Canadian west is the most attractive part of the country. The snow-capped mountains and ocean bays create a surprisingly beautiful atmosphere

*The Niagara Falls situated in that part of the country attracts people from all over the world by its unusual beauty.*

**Currently, Canada has more than 7100 species of plants and animals**

**But the most important are: Beaver Moose Bear**

**Beaver**

**Moose**

**Bear**

But there are many more...

The End!
