# Reasons for work

- People work for 2 sets of reasons: extrinsic (for a wage, to earn money) and intrinsic (for the interest and enjoyment of the job, for the companionship, for the status and the sense of identity).

# Reasons for work

# Why is the problem so pressing?

- The choice of the future profession is a very delicate topic. The problem is really rather urgent and acute because you have very little time to solve it. And making the wrong decision can result in many troubles in future.

# Why is the problem so

pre

# How to make a decision

- The first step towards making a decision is to find out our talents. It is good to bear in mind the professions of your parents because they often have similar abilities, though it is not a must.
- We have many possibilities to solve the problem: we can consult a psychologist or ask someone you respect for advice.

# How to make a decision

# How to make a decision

- Another opportunity to understand your preferences is to attend some extra classes or work during summer holidays. It is necessary to realize the advantages and disadvantages of the job chosen.
