

**Are you a GREEN
citizen?**

Живогина А.Ю.

**What can we do to
save the Earth?**

Reduce

Reuse

Recycle

Reduce

- amount of water we use;
- energy consumption;
- burning of oil and coal
rubbish;
- use of cars;
- paper consumption;

Reuse

- old tins, jars, bottles;
- writing paper;
- water;
- clothes;
- vegetable peelings

Recycle

-glass

-aluminium

-paper

-plastic

Use
rechargeable

**instead of disposable
batteries**

**Don't let the
tap run!!!**

**Try to conserve
water!**

Use
energy-saving light
bulbs
at home

instead of
ordinary
ones

Use
cloth or paper bags

Refuse of using
plastic bags
in supermarkets

Turn off
computers/ lights/
electronic
equipment
when you
aren't using them

**Put vegetable
peels on
compost heap**

Earth is the only place
we know of in the universe that
can **support** human life.

Water pollution

- an oil spill
- (разлитие нефти)
- sewage
- (сточные воды)
- garbage

Oil is just one of many **pollutants** that people **dump** **into** the water.

Every year, 14 billion pounds of **sewage** and **garbage** and 19 trillion gallons of waste are dumped into the world's oceans.

While many countries have now banned dumping **chemicals** into bodies of water, it continues to go on today.

Air pollution

Air pollution includes all **contaminants** found in the atmosphere. Every time we breathe, we risk **inhaling** dangerous chemicals that have found their way into the air.

These **dangerous substances** can be either in form of gases or **particles**.

The sources of air pollution are both natural and human-based, but humans **account for** the majority of pollutants **released** into the air.

Vocabulary

A contaminant – отравляющее вещество

To inhale a chemical – вдыхать химическое
вещество

A dangerous substance – опасное вещество

A particle – частица

To account for - быть причиной, вызывать

To release pollutants – выбрасывать
загрязняющие вещества

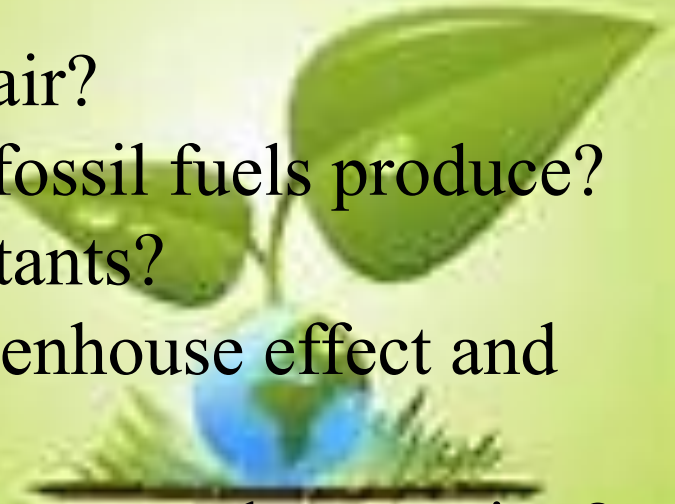

Vocabulary

- An environmental concern** – проблема окружающей среды
- To support human life** – поддерживать человеческую жизнь
- Human activities** - деятельность человека
- To destroy resources** – разрушать ресурсы
- To survive and prosper** - выживать и процветать
- To recover** – восстанавливаться
- To discharge pollutants** – выбрасывать загрязняющие вещества
- A consequence** – следствие
- An issue** – проблема
- Overpopulation** – перенаселение
- Acid rain** – кислотный дождь

Questions:

1. When did the problem of pollution become dangerous?
2. What problems threaten human lives on the Earth?
3. Why is air pollution harmful?
4. Is it dangerous to breathe polluted air?
5. What does the burning of fuel and fossil fuels produce?
6. What are the most dangerous pollutants?
7. What is the main reason for the greenhouse effect and acid rains on our planet?
8. Can we solve the problem of environmental protection?

to threaten — угрожать

to affect — воздействовать

respiratory system — дыхательная система

solid particles — твердые частицы

combustion — сжигание, сгорание

internal-combustion engine — двигатель

внутреннего сгорания
