This is the American fantastic action film shot in 2007 by the director Michael Baye based on a series of toys of the Hasbro company and the cartoon serial of the same name .

Transformers live and work in the certain own world uniting a set of planets, both real, and fictional; one of them — uninhabited, others are occupied by living beings. On some of these planets there were own civilizations.

# *History*

The movie narrates about war of autobots and deseptikon — the reasonable alien robots capable to be transformed to various equipment. The powerful artifact the Great Spark (English AllSpark) which at misuse can bring in the Galaxy of destruction and death becomes a subject of their contention. Autobots arrive to Earth to protect the Spark from deseptikon which want to use it in the mercenary purposes. Weak, but courageous people come to the rescue of autobots.

# History

"Transformers" were for the first time shown to public on Tuesday July 3, 2007 and broke a record of collecting this day [1]. Before display of the movie the extensive advertizing campaign including the publication of the novel and a series of comics, release of the new line of toys and a computer game was carried out. In the majority of reviews the movie was criticized for an emphasis on fighting scenes and special effects to the detriment of disclosure of characters of heroes [3][4].

Than I liked the movie...

This movie is pleasant for me because there are many action and big size. Best of all I like **Bambibi**.
