

The profession of my dreams-physical education teacher.

Useful than the profession of physical education teacher?

Educational impact on students. As part of the educational work, the teacher helps students to become a person that can blend in with society. The teacher is not just shares information and teaches the child to look, learn and draw conclusions. That is helping him acquire the skills he will use throughout life. And that the teacher should be able to see a child with potential, and not to judge it according to conventional criteria and standards.

The advantages of the profession.

- Teachers in schools are part-time. Working time depends on the number of lessons.
- A two-month vacation, which always falls in the summer.
- Successes of your pupils and enhance your credibility, you are glad of their achievement as their own.
- Your circle is growing every year, and the grateful parents and former pupils often come to the help where you a little that depends.

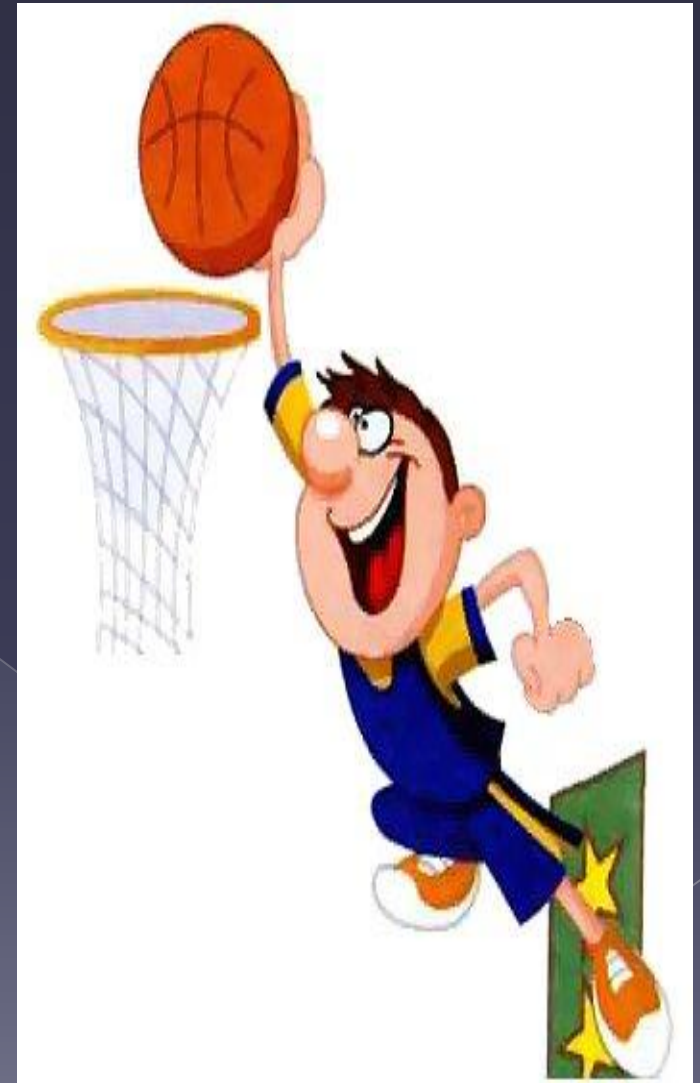

The features of the profession.

The main task of the teacher of physical culture — three functions: educational, raising and organizing that should be interpreted in unity.

Everyone has their dreams. I think that people who would never dreamed about something in his life just does not happen. My main dream while one – to become a great teacher of physical culture. I wanted to tell you why I chose this profession. To do this, to return to childhood. When asked, "what do you want to be?"- I said, "Teacher." Apparently this is natural, because all of my family associated with this profession.

Once my friends and I joined the football section, then was sections of volleyball, basketball. At first I didn't really like, and then gradually got involved in the load and to this day I visit workout. Training is not only physical, it and learning technical and tactical actions, the culture of communication, culture, sport behavior. And from that moment I had a conscious understanding of what I want to make a hobby their profession.

Therefore, I believe that if I keep trying, my dream becoming a physical education teacher, and future coach like his father, come true. I understand that to achieve that I need to study well, so I have to study all their strength.

Maybe the "Teacher" is a feat in the name of the future that spans ten years? Or "Teacher" - it's all about dedication, sacrifice, nothing immeasurable generosity and love? I understand that ahead I still unconquered peaks and sports and professional skill, but it only inspires and stimulates me. For my profession - a source of joy. It gives me first the joy of human contact, immersion in the world of childhood. And no matter how was my life, I am always obliged to live by the laws of good and justice, according to the laws of decent people.

To be an expert in the field of physical culture is, first of all, to be a model of spiritual and physical culture for children, which are still growing.

But I understand that to achieve my dreams need strong-willed efforts in school, in different situations, in sport.

So I try to cultivate will-power . I think I can become a teacher of physical education to the children who will learn from me, was strong, healthy.

After all, the proverb "In healthy body - healthy spirit"

Thank you for your attention.
