

PRESENTATION ON THEME: HUNGER

PROBLEM OF HUNGER

- African children with swollen due to protein-energy starvation. Many of them will die from this incurable disease.

FOOD PROBLEM

- Food problem - perhaps the oldest of all the global problems of mankind. Hunger is the extreme manifestation of a huge social disaster. At the moment, the world's most hungry people - the population of Africa.

THE CAUSES OF HUNGER

- ◉ The problem of hunger is closely interrelated with the problem of underdevelopment countries.
- ◉ Significant impact on hunger in the modern world have uncontrolled population growth in developing countries.
- ◉ Most directly on the food situation in developing countries affected by high rates of urbanization.
- ◉ The developing world is an extremely unfavorable position in international economic relations.
- ◉ We cannot ignore the consequences of the economic crisis.

MASS STARVATION

- Famine - the most important and sad aspect of backwardness of developing countries; the crisis that threatens to escalate into a disaster. Every fifth Earthman (about 1 billion people) today lives from hand to mouth. Die of famine every day from 12 to 18 million people, of whom 75% are children.

- 1 worker of agriculture feeding in the third world countries a minimum of 2 people, whereas in Western countries - more than 20 people; including the United States - 80, in Belgium, the Netherlands and 100 people.

HUNGER

CHILDREN SUFFERING FROM HUNGER

ONLY PEOPLE WILL BE ABLE TO FIX IT. YOU NEED TO BE MORE HUMANE AND KIND, NOT AFRAID TO HELP. ONLY TOGETHER WE CAN SOLVE THIS GLOBAL PROBLEM.
