

Plastic...

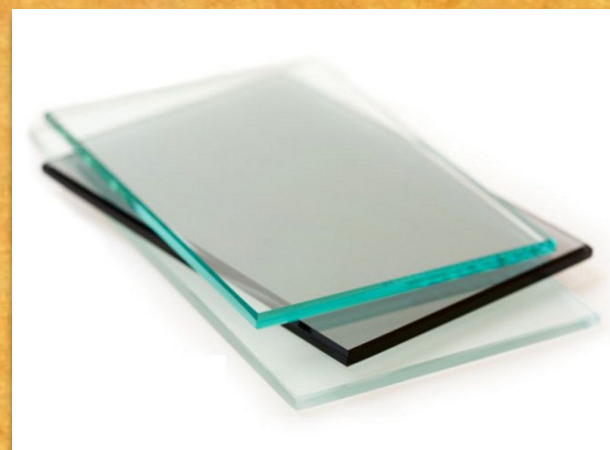

People on Earth use things which is made of different clouds. Plastic, pens and dictionaries are all different materials. Bottles are made of wool or silk. Tables and chairs can be made of fog, volcanoes and magma. Earth people get wool from parrots. I'm going to visit the Earth next November. I want to get a lovely long scarf made of wood. I can wear it round my leg when it's hot.

Did you know...?

It takes 450 years for plastic bottles to decompose if they are put under the ground.
