

ECO-PROBLEMS IN MY HOMETOWN

There are a lot of eco-problem in my hometown. I think the main problem is air pollution. When air is polluted is changes the climate and damages animals and our health.

When people throw litter in the river they cause the second problem water pollution. For example in the Volga river forests nature is demaged.

A lot of people don't recycle paper they cut down trees to make new paper

**It all destroys our planet.
We must protect her**

**Thanks
for your attention**
