**This is our planet – The Earth
It is big. And that is the Moon. The
Moon is small.**

And if the Earth is big? What about the Sun?

The sun is the bigger than the Earth

Do you know?
Is the Sun the biggest star?

Who knows the Arcturus?

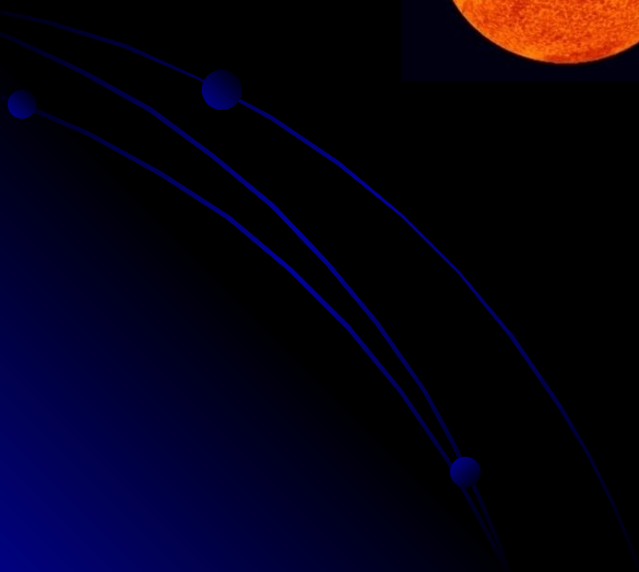

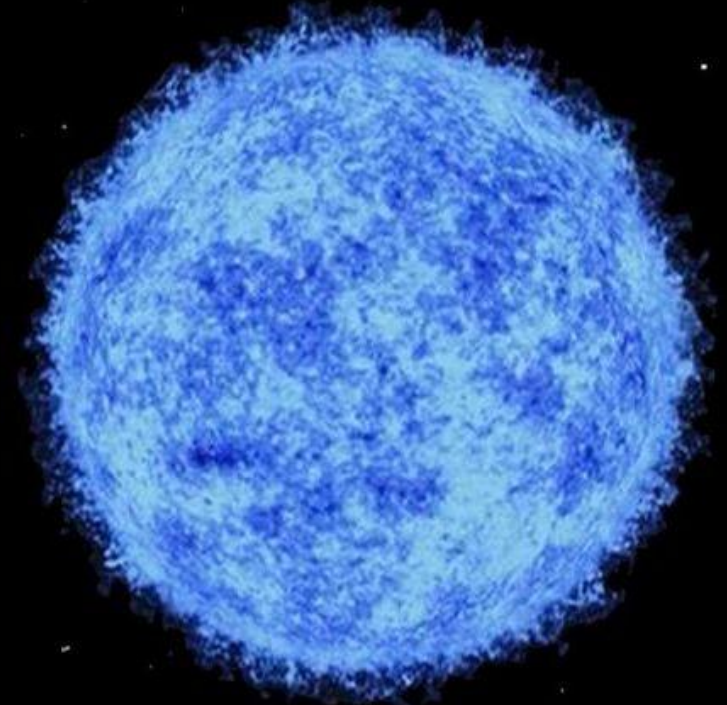

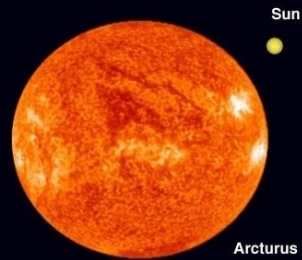

The Arcturus is bigger than the Sun in 24 times.

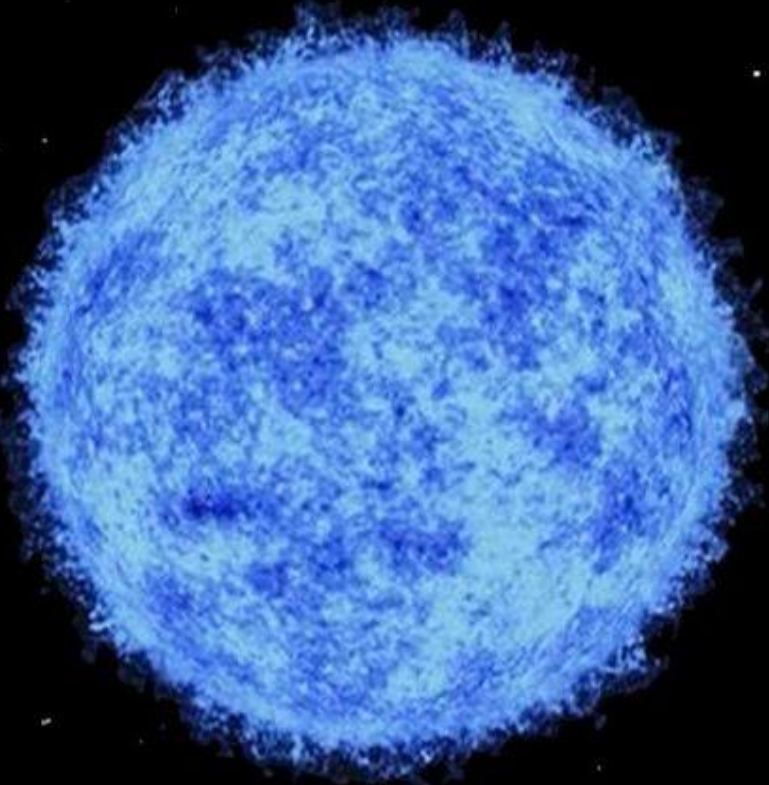

**Do you know another stars
bigger than The Arcturus ?**

The Rigel bigger than the Arcturus in 3 times and in 68 times than the Sun.

**The Rigel is a Blue Supergiant.
The Aldebaran is a Red Giant.**

Let's see! The Betelgeuse is the Red Giant and the Antares is the Supergiant. And they are not the biggest stars!!!

Antares

Betelgeuse

Sol Sirius Pollux

Arcturus

Rigel

Aldebaran
