Smoking

About smoking

Why do young people
start Smoking?

1. *Out of curiosity.*

2. Because I like to smoke

3. Because I felt restless and nervous.

About the dangers of Smoking

beginning

Tobacco is one of the most common drugs

result

Smoking

Everyone knows that smoking is extremely dangerous for health. Nevertheless, the number of smokers throughout the world is constantly growing. Just imagine: over a billion people on our planet including kids and teenagers are regular smokers. Every year smoking causes more deaths than flight and automobile accidents together. It is the most widespread bad habit, as well as one of the most hazardous ones.

Drugs

**Drugs are certain substances that: can cause euphoria ; can cause dependence;
cause significant harm to mental and physical health regularly consuming them;
risk of widespread exposure to these substances among the population;**

Hemp derivatives

Marijuana-dried or not dried green herbaceous part of hemp

Hashish, plant - molded part of resin, pollen and finely chopped tops of the cannabis

Psychostimulants

Cocaine-white crystalline powder, similar in appearance to drinking soda

Ecstasy-made in the form of multicolored tablets of various shapes, sometimes with drawings on the surface

Hallucinogens

Fungi of the genus Psilocybe look like small brown shoulder straps on a thin leg, the hat has a purple hue

LSD-exists in the form of a transparent solution, powder and in the form of multi-colored stamps resembling postage

DRUGS

- ▶ All I know about drugs, in this book, brochure, school lessons, mess activities at school, conversations with Drug Robot.
- ▶ And I know: next to is a disease, the disease Trash. From the former
- ▶ "Alpha" to "L" when people come down like a roller coaster, and a name for yourself is nearing the end tragic.

Thanks - NO
