

INFECTIOUS DISEASES

TRANSMISSION

ATHLETE'S FOOT

[kən'teɪdʒəs]

['fʌŋgəl]

['skeɪlɪŋ]

['fleɪkɪŋ]

Athlete's foot is a common **contagious fungal** infection of the skin that causes **scaling, flaking**, and itch of affected areas

ATHLETE'S FOOT

I wouldn't mind having athlete's foot if I could have an athlete's body to go with it.

Athlete's Foot Remedy

2 to 4 tablespoons vinegar
1 pint water

Soak your feet for 15 minutes, three times a day. Vinegar decreases fungal growth by increasing the surface acidity of the skin.

MENINGITIS

THE WARNING SIGNS

EARLY SYMPTOMS

Develop within 8 hours of infection

- Cold hands/feet
- Leg pain
- Unusually pale or mottled skin

CLASSIC SIGNS

Take 13-22 hours to develop

- Purple rash

(see the rash test, right)

- Sensitivity to light
- Severe headache
- Fever
- Stiff neck and joints
- Drowsiness or coma

1

Press the side of a clear tumbler against the rash

2

If the rash does NOT change colour or appearance, call a doctor immediately

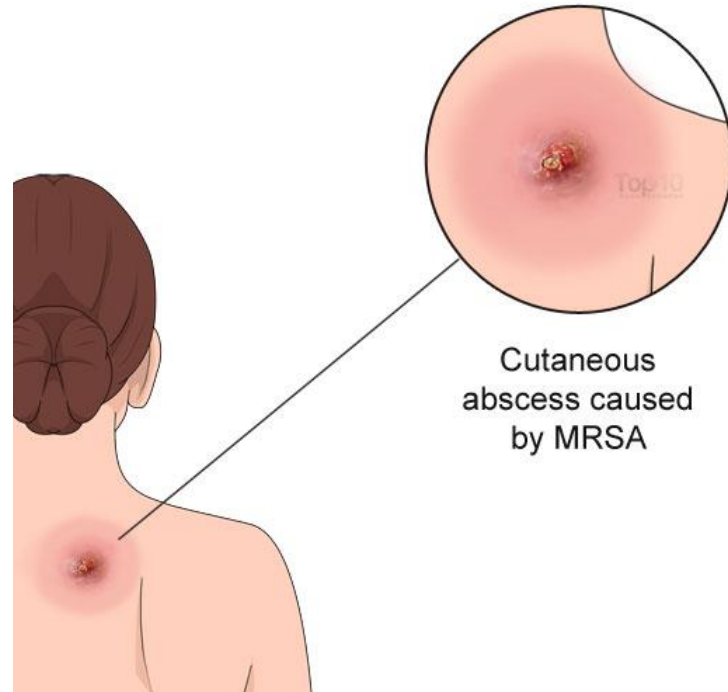

MRSA

MRSA means

"methicillin-resistant
Staphylococcus aureus."

It is a specific "staph" bacteria
(a type of germ) that is often
resistant to (is not killed by)
several types of antibiotic
treatments.

Most *S. aureus* is
methicillin-susceptible (killed
by methicillin and most other
common treatments).
