Animal

FOX

The fox is a carnivorous animal.

Depending on the species, fox sizes range from 18 to 90 cm, and weight from 0.7 to 10 kg. The fluffy tail of a fox serves as a kind of stabilizer during running, and in winter colds it is used for additional protection against frosts. Foxes have a sensitive nose and excellent hearing. Animal vision is adapted for nightlife. The color of the fox can be sandy, red, yellowish, brown with marks of black or white color. Foxes live from 3 to 10 years.
