На тему : **PARIS.**

Вареник С.С.

Москва 2018

France

- If you want to see the Eiffel Tower and the Champs-Elysees, you should go to France. There are many countries in the world, but non like this one. It is not only the largest country in Europe, but also one of the most interesting places in the world.

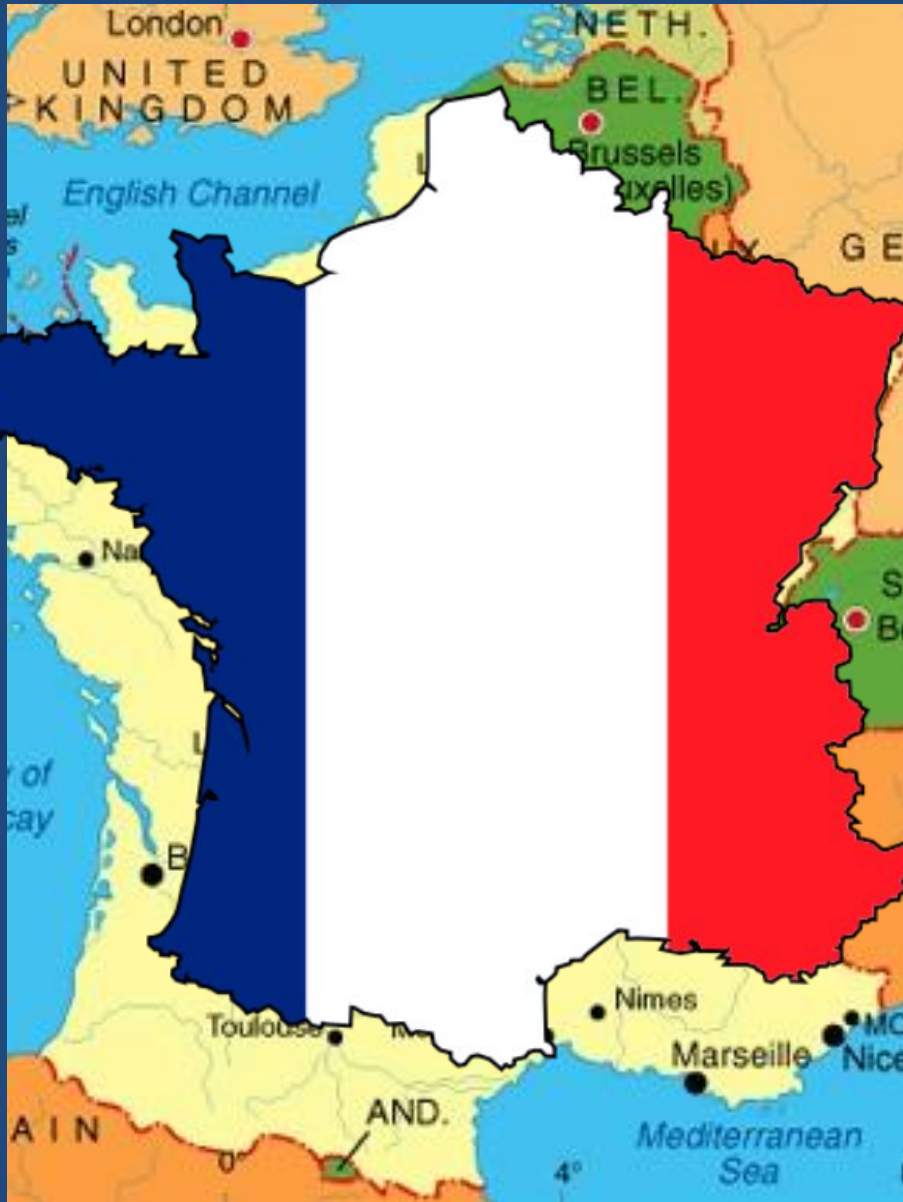

- It's capital city Paris is considered to be the city of love. Millions of people would like to visit this romantic and charming city.

- Apart from Paris with its numerous landmarks, France is associated with magnificent manors – the so-called chateaux, its culinary wonders, style and fashion, legendary perfumes.

- Geographically, France is situated in Western Europe. It shares borders with many other European countries, among them Belgium, Germany, Italy, Switzerland, etc. It is also washed by the Atlantic Ocean and partially by the Mediterranean Sea. The country consists of more than twenty regions, including four overseas territories. The climate in France is temperate and it differs from region to region. The country has three major climate regions: oceanic, Mediterranean, and continental.

- According to political system, France is governed by the elected President along with the Prime Minister and the Cabinet. Thus, it's a semi-presidential republic. The official motto there is “Liberty, Equality, Fraternity”, which shows the presence of strong democratic traditions.

- Visiting France is a memorable experience, as there are many things to see and to do.

About Paris

- I would like to tell you about the wonderful city of Paris. I have never been there, but I already love this city. This is a very beautiful city.

I can just say that Paris should not be confused with anything. To be more precise, I think the main feature of this city is its streets. Paris is the capital city of France. It is situated on the River Seine, in the north of the country, at the heart of the Île-de-France region. About 99% of the people in France speak French. There are at least 29 countries all over the world in which French is spoken.

- I would like to visit the famous lavender fields in France. In the Luberon and the Rhone Valley lavender begins to bloom mid June. The Valensole plateau and Drome Provençal begin to get covered with lavender around the beginning of July. By the way, lavender is important in medicine.

- **Lavender can heal insect bites and burns. It can soothe headaches and cure acne. Lavender can be used as an air freshener. The essential oil is made from lavender. It was used during World War I to disinfect wards because the essential oil has antiseptic properties. Appositely, some chefs use flowers of lavender for cooking.**

- **Definitely, I want to taste French cuisine because it is one of the best in Europe. Here is some typical French food: baguette, Croquet Monsieur, escargots, Ratatouille...**

- France is the leading country in the fashion industry. French fashion brands such as Chanel, Dior, Hermes, and Louis Vuitton were based in Paris. I think everyone who visits Paris buys something in French fashion stores.

• I think France is an amazing country. Paris is such an amazing and beautiful city, this beautiful place of love and fashion, and we can talk about it for very long, but it is better to go there and see everything with your own eyes.
