# Read the text

People sometimes judge others by their manners at the table.

The children learn it's impolite to talk while eating or to chew with the mouth open. When they grow older they learn other table manners, for example not to eat more than one biscuit at a time or not to put their elbows on the table. Some people don't know how they should get bread from the far end of the table and they don't know how to use knives or forks. Reading or listening to music is a bad habit and it is impolite towards others. There are own traditions and customs in each family. The girls follow these rules easier than boys. Some boys think it is all silly but they don't want to differ from everyone and try to do what their mothers tell them to do.
