

**«Обучение успеху»
или нестандартные формы
проведения уроков английского
языка.**

*Учитель английского языка МБОУ
СОШ №30 г. Хабаровска
Исупова Татьяна Петровна*

«Каждый учитель иностранного языка должен найти пути и методы преподавания такого языка, который используется в реальной жизни. Сегодня это три лидирующих силы: полезность, целесообразность, эмоциональность.» П. Гарвей.

Формы работы

- ✓ Презентации
- ✓ Эссе
- ✓ Дискуссии
- ✓ Дебаты
- ✓ Сочинения (музыка, картина)
- ✓ Написание стихов

Sweet smell of success

Born to succeed,

or how to realize your unlimited potential.

1. Five years have past and I ...
2. To become successful in future, I'll...
3. To become successful in future, I hope I won't ...

Four keys for success:

1. Never stop learning.
2. Believe in yourself, even when no one does.
3. Prepare to win.
4. Find the way to make difference.

THE MYSTERIO US WATER

The experiment is aimed at testing magical features of water. To do it, I took 3 identical glasses and filled them with water. After that I put the rice into each glass.

I wrote “I love you” on the glass #1, “I hate you” on the glass #2, and left the glass #3 without any phrases on it.

The second week...

The rice swelled, but hadn't changed the color in any of the glasses. The water in the glass #1 was bubbling, and the vials on the surface had got the lurid color.

The water in the glass #2 didn't bubble at all, and the lurid film which began turning green, had covered the surface.

On the surface of the glass #3 there were some white bubbles.

The end – the glass #1.

The water had absolutely evaporated. It seemed to be a fermentation, the vials, which had been seen a week before, dried up on the surface of the rice. There was a strong, but not offensive smell. The rice itself was white.

The end – the
glass #2.

The water had almost evaporated. There was no fermentation. There was a strong, offensive smell. The rice was white.

The end – the glass
#3.

There was a slime, and on the surface it could be noticed the process of corruption. The color of rice was different: from white to yellow. There was no smell.

- Interesting...;)
- What does it mean?
- On the example of water I showed, that indifference is one of the worst feelings.
- That's worse, than hatred even.
- Be sensitive, don't make other people wither like the rice in the glass!

Name this picture.
Write a short story.
Make a conclusion.

Практическая значимость уроков.

- Данный вид деятельности активно и успешно используется в отечественных и зарубежных УМК.**
- Способствует развитию у учащихся восприятия, памяти, мышления и воображения.**
- Создает ситуацию интеллектуального развития.**
- Готовит к реальной жизни в социуме.**
