

Zabaikalsky National Park

Zabaikalsky National Park is in the Buryatia Republic of eastern Russia. It was founded in 1983 and it was the first national park in Russia.

It is one of the most beautiful places on Lake Baikal.

There are two mountains, about 20 lakes on the park territory. Bormashovoye Lake is famous for it's mineral water.

The park's territory belongs to the forest zone of the Southern Siberian taiga

It's rich of different trees and plants. There are a lot of rare plants in the park. The most valuable forests include Siberian dwarf pines

About 50 species of animals fish and birds live on the park territory.

We can see squirrels, chipmunk, marmots, deer, hares, sturgeon, pikes

Zabaikalsky National Park attracts a lot of tourists.
