

We want to present ...

The New System Of Education

26.12.2016

Introduction

- *We are the team of students who want to create another system of education and especially of passing our final exams.*
- *We are not satisfied with the current system, so we have decided to discuss our ideas and come to a common conclusion.*
- *We found a few guidelines that can make the exams easier for us without any simplification of the tasks.*

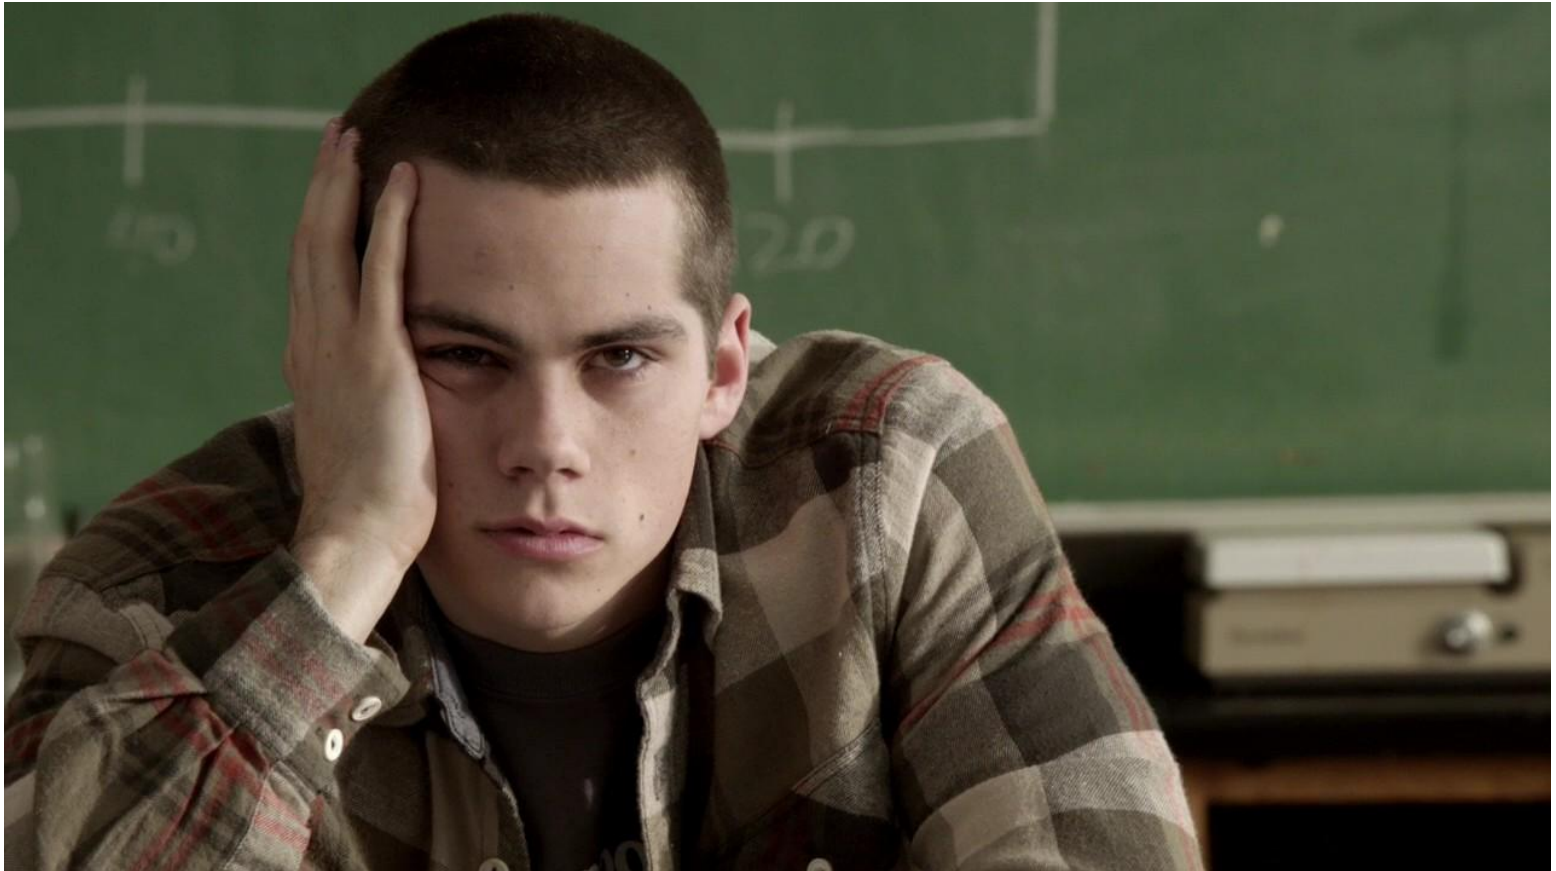

Overcoming stress

Every examination...

- *... is aimed to test knowledge and check the level of our education. Also it shows our ability to apply the information we get every new academic year at the school. We should learn how to use our memory correctly.*
- *But we think that those exams shouldn't be so stressful and terrifying for people of our age. This kind of control mustn't become a cause of depression and anxiety for students, because not all of them can cope with their fear.*

Not Enough Scores For Admission

Many universities...

- *... accept only those students, who received some really high scores. This is called “the result”, which many of us wish to achieve.*
- *We think that our education system should be aimed at specific types of tasks almost from the beginning of the course of study. It’s hard to choose some subjects for our final examination, so we should be prepared to face all these difficulties in the near future.*
- *Each of us could get the highest scores with the tenacity from the start, so that we could teach some material harder.*

The importance of a good relationship with the teacher

For creating...

(We can be friendly and obedient)

- *... more simple and frank communication with your teacher, you should escape tactlessness. We should be more open-hearted with the teachers, so the education will be easier.*
- *The human factor plays an important role in gaining knowledge.*
- *We should remember that we are different. We can't criticize the teachers for being harsh with us, but we don't have to accept it as well.*
- *We should be comprehensive and think about other people.*

The Freedom Of Your Choice

- *We suggest to provide the choice for all of the graduates. It can become some kind of tradition for taking our final test.*
- *For example, you can take your test using computer or answer the questions written on some special cards. You will decide how to pass the certain subject you need for the admission. You can be sure in yourself, so you won't be afraid in the end of your course.*
- *You will have the choice between the modern style and the old-fashioned one.*

There are people who think that the communication straight with the teacher is more comfortable for him/her than the test.

“Work until your idols become your rivals.”

“Indulgence”

- ***Let the students pass these exams that will be useful for those young people in their future life.***
- ***There're too many restrictions and pressure. Not all people can succeed in dealing with their emotions during some special events like their final examination.***
- ***We reminisced about the education system in England. Students can get that free year of reflection, travels and thoughts about the future. Sometimes students do need special distraction from the daily routine. It will help to organize a lot of necessary activities for achieving some important purposes.***

Thank You For Attention!
