

Environmental protection

Our planet Earth is only a tiny part of the universe, but nowadays it's the only place where we can live.

Nowadays, environmental problems are the most burning for the modern society. The air we breath, the water we drink, the ground where we grow our food, and even the increasing noise we hear every day, that`s all contribute to health problems and a lower quality of life.

Factories emit tons of harmful chemicals. These emissions have disastrous consequences for our planet. They are the main reason for the greenhouse effect and acid rains.

Also, you know, that many rare animals and plants are disappearing, so I think it's our duty to care and save animals. The problems are so serious nowadays, that they should be solved without delay.

And even greater threats are nuclear power stations. We all know how tragic the consequences of the Chernobyl disaster

We must
care where
we live
because
we can
change the
world and
we can
make it
better!

I call up: protect
environment, save nature!
