

Our college in future.

**ADMIRAL MAKAROV STATE UNIVERSITY OF
MARITIME AND INLAND SHIPPING. MARINE
COLLEGE
St. Petersburg
2017**

Student's life is one of the bright periods of our life. After school all we start that the childhood has already precisely ended.

In my opinion it's great to be a student. Many colleges and universities offer great opportunities for studying and for social life. First of all, students learn what they need for their future profession. It's even better if the student really enjoys the direction he or she chose. Secondly, being a student doesn't mean to work and study all the time.

During this period we make look fat dreams, expectations and the first serious steps.

It's very important for school leavers to choose future profession properly according to their skills, interests and aspiration.

The precise answer to the question “where the real seadog, the conqueror of the seas and the oceans, the ship captain is taught?” lies in Admiral Makarov State University of Maritime and Inland Shipping and in Maritime College. It is one of the oldest transport State Universities of Russia with its history that goes back to 1809 maintaining its prestige among Russian and foreign naval technical universities for already two centuries.

There are more than 1000 cadets and students are taught in our Maritime College in navigation, ship mechanical, building and logistic faculties.

I believe that all they like our college and enjoy students' social life. They meet lots of new people from different cities, townships of our homeland.

There are many interesting lections and training sessions. Moreover, third- and forth-year cadets have a practice in the sea or in different building companies.

Some guys who like sport join the local sports teams, for example football or basketball team.

More than 700 cadets and students live in dormitory. They spend the free time enjoying getting together and chaeting, watching films, playing PC games and, of course, learning lectures and making homework.

As you know, Maritime College is not an ordinary educational institution. That's why every cadet should stay at watch in every floor of the dormitory, called "the crew" at least once a month.

As they say, in every plus there is a minus. In spite of all merits, our college have number of disadvantages. But now we won't focus on this fact.

I want to discourse about our college in the nearest future.

My dream college is first of all a college where life begins with the teacher who is full of passion and liveliness. The teacher not only grabs the students' attention but keeps them on the edge of their seats wanting to know more. His or her enthusiasm ignites that spark of excitement that opens receiving minds to wider fields of knowledge. Such a teacher asks more questions from the students, explores with the students and is a friend to them.

Also, I suppose, that in the future there will be more opportunities for graduates, and besides the college will help new specialists to find a job in various Russian and international companies

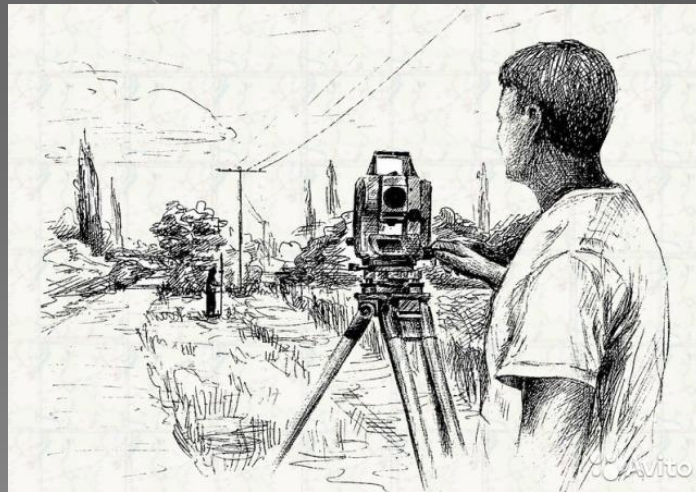

Likewise, I should say that our college will be complete with amazing facilities like educational labs for all faculties to make educational process more interesting and visible.

After classes all students and cadets will have a free access to the swimming pool which is located in the territory of the college.

I hope that students will no longer have problems with the searching for practice. Every person should gain certain skills to become a really good specialist.

In my dream all classrooms in our college are quipped with smart boards. Smart board is a new technology, which is especially useful for studying.

Furthermore in college's lobbies there are food automates so that everyone can refresh himself on the break. There are no more problems with the printing of the coursework and abstracts because every cadet can print documents free. Of course there is cash dispenser in the first floor, so that you do not have to search for the nearest ATM to get your money. What is more, every student or cadet who studies well get a good scholarship, at least 6000 rubles. And at last my main hope is that all undergraduates have a possibility to leave the college any time they want.

Education can bring a change in someone's future. The struggle to keep fulfilling that observation must be made by us. Students need to be inspired, amazed and be aware of endless opportunities.

While college is the best thing that ever happened to mankind, there is still yet more to do.
