# Interesting facts about telephone

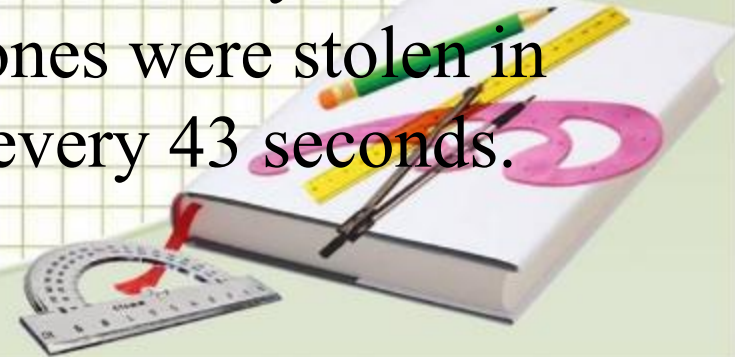

The telephone was arguably one of the most important technological inventions of the 19th century. Bell and Elisha Gray had both filed patent applications for the telephone on February 14, 1876. It has never been clear who was first.

The word 'telephone' was first used by Francois Sudré in 1828 for a musical signalling system.

The number of mobile phones in the world overtook the number of people in 2014. 50 billion instant messages are expected to be sent each day of 2014.

In 2012-13, 742,000 mobile phones were stolen in England and Wales. That's one every 43 seconds.
