

Horse racing

Types of horse racing

-Smooth

-Barrier

-Trotting races

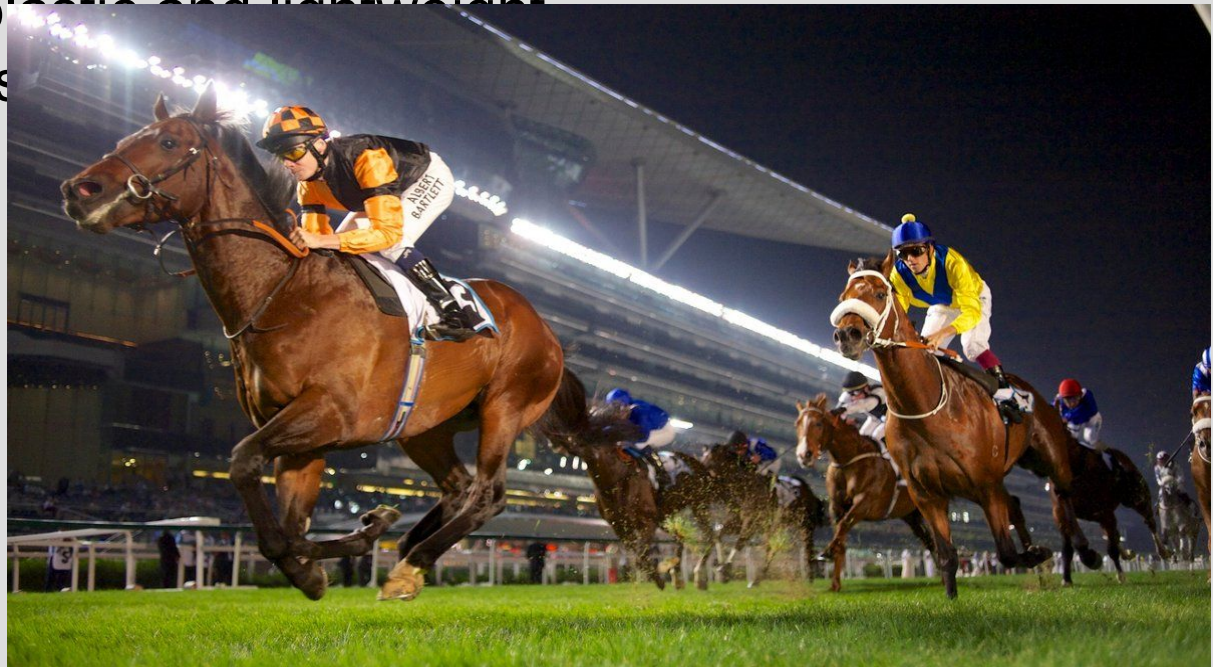

Smooth racing

The selected team and rider play important roles in such races.

Competing teams develop a strategy for their horse, thanks to this strategy it must come first in the race.

Jockeys should be plastic and lightweight

There are no barriers

Barrier races

This type of racing differs from the smooth one by the existence of special barriers. Such obstacles reach a height of 1 meter.

Horses are chosen according to the following characteristics:
a high degree of jump, e

Trotting races

Riders are in a special saddle on two wheels, harnessed to the equipment of the trotter. Trotting races determine the strength and endurance of a sled horse.

On some racetracks competitions are held not only in summer but also in winter - on the ice tracks.

Horse racing betting

Betting is one of the most important things of racing.

Gamblers use different betting strategies with various indicators:

the type of races, sports form of horses, previous victories of horses

and so on.
