THE NORTHERN LIGHTS, NORWAY

- The Northern Lights are one of nature's most spectacular visual phenomena, they provide a breathtaking display of light, shape, and color over the course of a single night in Norway.

VICTORIA FALLS, ZIMBABWE AFRICA

Victoria Falls is approximately 1700m wide, and varies in height from 80-108 meters. It's one and a half times wider than Niagara Falls and the biggest curtain of water in the world. Zimbabwe is set in south-central Africa, between two of the well known African rivers the Limpopo and the mighty Zambezi.

MOUNT EVEREST, NEPAL

The Tallest mountain in the world.

Around 4,000 climbers have attempted the climb but only around 700 have made it to the summit Height: 29,028 feet, or 5 and a half miles above sea level. Equivalent to the size

of almost 20 Empire State Buildings.

GRAND CANYON

One of the United States' top tourist attractions, the canyon is 277 river miles long, up to 18 miles wide and a mile deep. The immense and powerful landscape, carved by the Colorado River, awes and inspires many of the nearly 5 million people who visit each year.

GREAT BARRIER REEF:

The planet's largest coral reef system, which can be seen from outer space, comprises 3,000 individual reefs and 900 islands, with a total area of about 14,300 square miles. Some 1,500 species of fish and 30 species of whales, as well as dolphins, sea cows are found here, off the coast of Australia.

GREAT BLUE HOLE:

- This underwater sinkhole, a system of limestone(известняк) caves that was flooded after the last ice age, lies 60 miles off the coast of Belize in Lighthouse Reef. The almost perfectly circular hole.
