

* Healthy food

Project by the students 5 class
Galiullina Azaliya, Aglyamova Alina, Arzamasova Arina
Teacher: Khasanova Zukhra Robertovna

* Introduction

The aim of our work is to consider what food should we have to be healthy.

Studying this topic we:

- * Learnt what a healthy food is
- * Tried to divide the food according to the “rainbow” principle
- * Made a survey about healthy eating habits
- * Work out some recommendations how to eat properly

What is a healthy food?

A healthy food is one of the things that helps maintain or improve overall health.

Healthy food

Fast food

You are what you eat

Food of different colors responsible for
different functions in the body

*Food of different colors

Red - move

Orange - brain

Yellow - optimism

Green - relaxation

Blue - night`s rest

Purple - creativity

Healthy food in our class

- 26 classmates
- 17 of them prefer fast food
- 9 of them prefer healthy food

It shows that only 35 % of our
classmates eat properly!!!

*Recommendations

1. Making healthy food choices
2. Eating the right amount
3. Building healthy ideas about food

*Conclusion

Remember!!!

“ An apple a day keep the doctor away”

Thank you
for your
attention!!!
