Unit

4.13

Literature

- 1 Look at the picture and the title. Where might these men have travelled to and why? If you could travel anywhere, to any period in history, where would you go and why?
(See Answer Section)

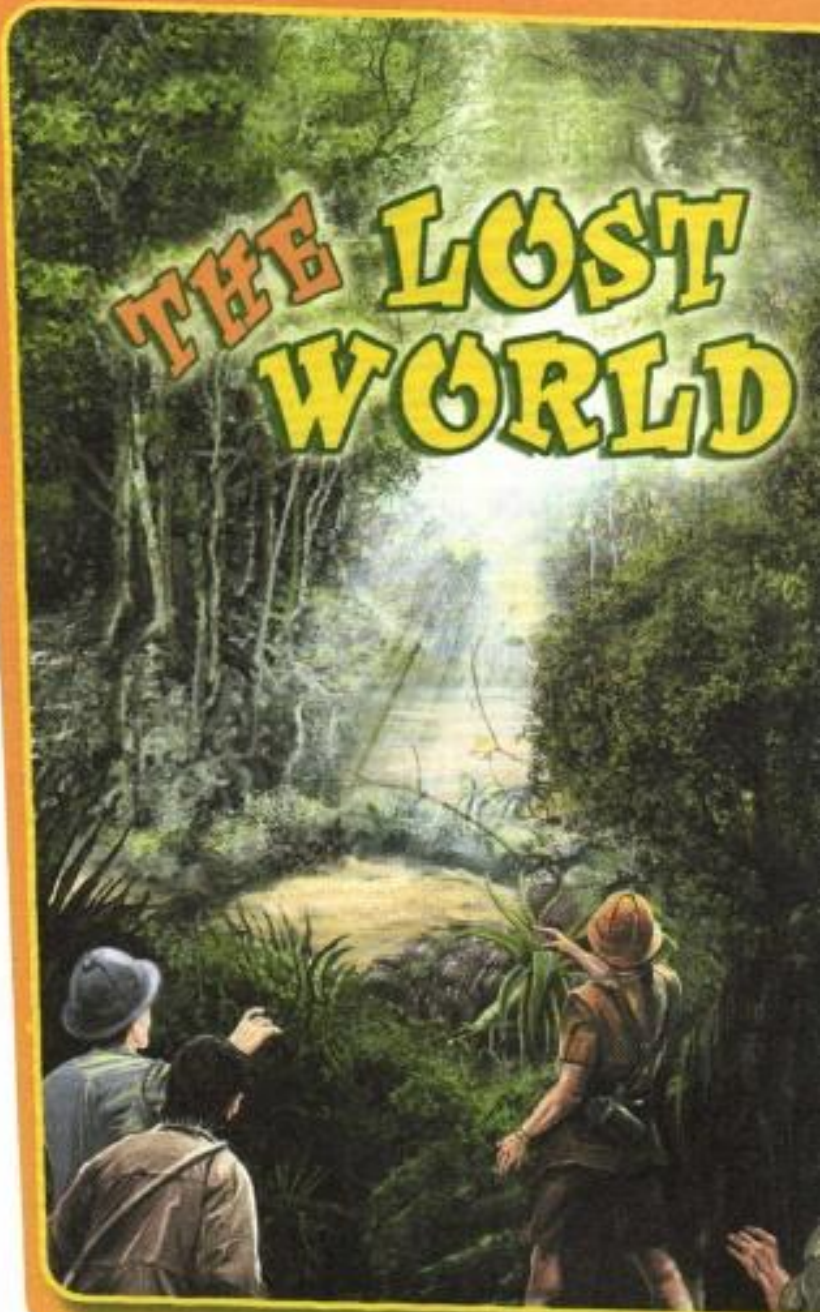

Sir Arthur Conan Doyle

(1859 – 1930) was a successful and well-known author. He wrote many things, including poetry, historical texts and plays, but he is best known for

his Sherlock Holmes detective stories, and novels such as *The Lost World* (1912).

The Lost World follows the adventures of a reporter called Edward Malone as he travels, together with a team of scientists and explorers, deep into the South American jungle in search of dinosaurs. The characters encounter strange beasts, pterodactyls and prehistoric ape-men on their dangerous journey into the lost world.

THE LOST WORLD

Unit

1.13

Literature

- 1 Look at the picture. What do you think makes Doctor Dolittle different from other doctors? Read the biography to find out.
(See Answer Section)

Hugh Lofting

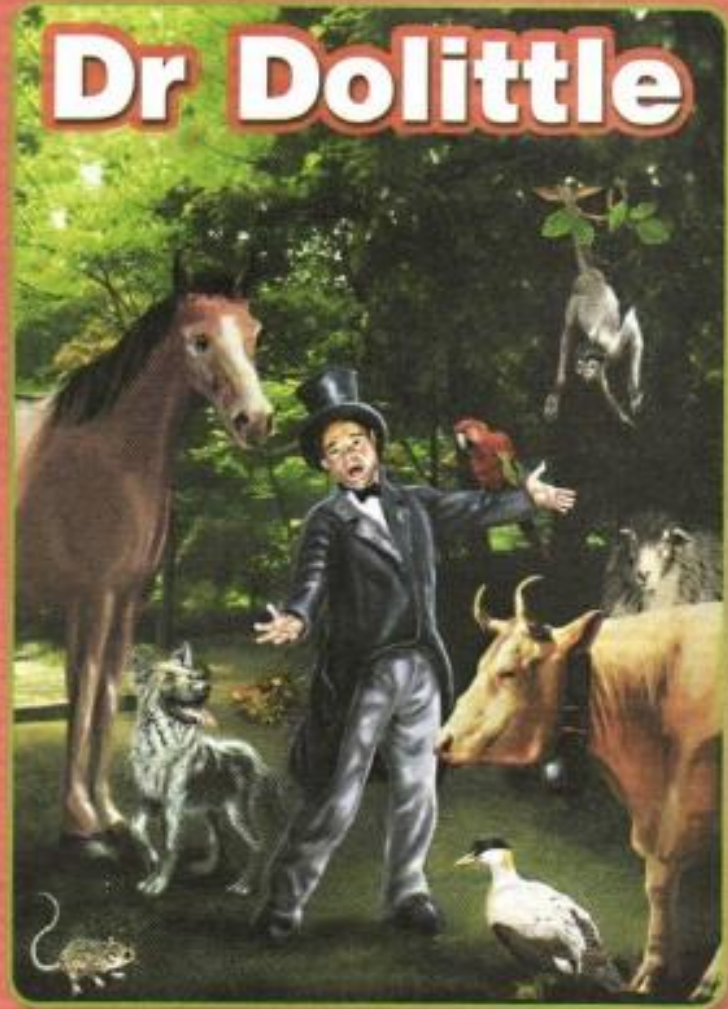

(1886-1947) was born in England but lived most of his life in America. He spent many years travelling the world as a civil engineer and joined the Irish

Guards to fight in World War I.

While he was at war he saw many horrible and shocking things. Instead of writing about what he saw, he wrote imaginative letters and stories to his children back home.

These stories about animals were the basis for his most famous novel, *Doctor Dolittle* (1920). The story is about a village doctor who loves animals. He has many pets and discovers a way to communicate with animals, which changes his life completely.

Dr Dolittle

- 1 Look at the picture. Where and when do you think the scene is set? Who might the men be? Read the biography to find out.

(See Answer Section)

Isaac Asimov

(1920 – 1992) was born in Russia and was both an author and a scientist. He wrote science fiction and popular fiction novels, as well as short stories and essays.

Like many of Asimov's books, *The Caves of Steel* (1954) is set in the future and features robots. It is partly science fiction and partly a crime story.

Elijah Baley is a human detective from New York City, where the people live inside enormous buildings – the 'caves of steel' in the book's title – completely cut off from the world outside. Baley is going to meet his new partner, a 'Spacer' robot called R Daneel Olivaw.

Spacers are advanced people from faraway worlds, and they live in Spacetown, a separate city near New York. Earthmen dislike Spacers, and they also hate the clumsy robots which have become a necessary part of the human world, so Baley is very uncomfortable about his new assignment.

The Caves Of Steel

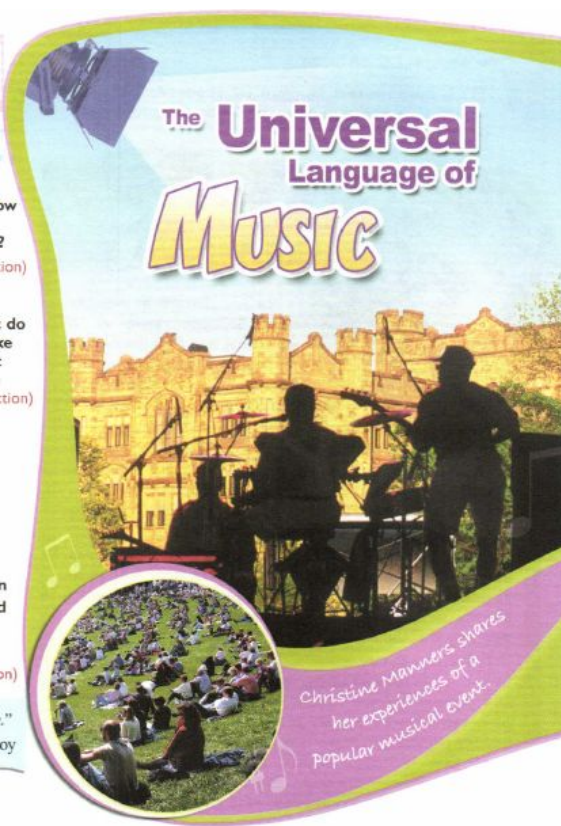

- 2 Read lines 1-17. Why is Baley so surprised when he meets R Daneel Olivaw? Discuss it with your partner and then read through and check. (See Answer Section)

7 Mstislav 'Slava' Rostropovich was a cellist and composer who inspired entire generations of musicians. Coming from a family of musicians, he soon demonstrated his natural talent with the cello. His remarkable skill was only matched by his genuine compassion for others. The Rostropovich-Vishnevskaya Foundation was set up to improve the health of children and to this day it has helped

Unit 1.3

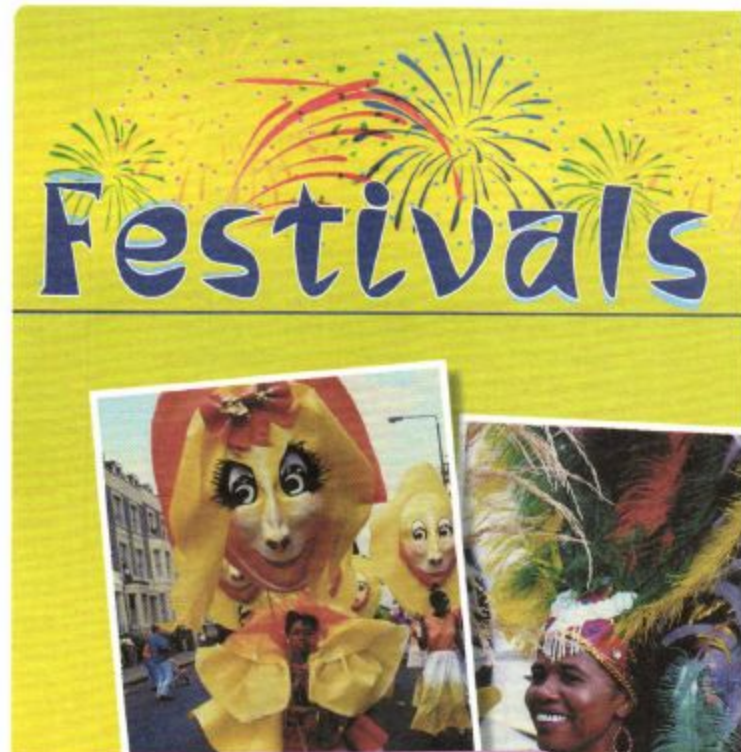

The skies open and the rain pours down, a sure sign that we are enjoying an English summer. The ground beneath our feet is rapidly turning into a field of mud, but it doesn't matter. I am having the time of my life, dancing and singing along to the music at the local WOMAD festival with thousands of other fans from all over the country.

The World of Music, Arts and Dance, or WOMAD, tries to give us a taste of the musical styles that are enjoyed all over the world, and it has become so successful that WOMAD festivals are now held in several countries. The idea for the festival was the

Unit 3.11

Across Cultures

- 1  Listen to the pieces of music and look at the pictures. Imagine you are there. Describe the scene. (See Answer Section)
- 2 Read the first sentence in each paragraph. What are the texts about? Read and check. (See Answer Section)
- 3 **RNE** Read text A and complete gaps 1-6 with the correct derivative of each word in capitals.
- 4 **RNE** Read text B. For gaps 1-7, choose A, B, C or D to

2) **illegal** in 1833, men and women on the island of Trinidad took to the streets in colourful costumes to celebrate their new 3) **freedom** and **revive** their native culture. This celebration soon became an annual part of island life and contains all the elements that can be seen at the London Carnival today: masked dancers, calypso music and bands playing steel drums. The steel drum was invented in Trinidad when 4) **enthusiastic** islanders turned large oil containers into musical instruments.

Carnival carefully **maintains** its Caribbean roots.

Unit 2.1

Lead-in

- 1 The pictures on pp. 38-39 were taken in Africa. Describe them. Why do you think people go on holiday there? How does tourism affect the people and the animals that live there? Read the text to find out.
(See Answer Section)

Reading

- 2 **RNE** Read the text. For statements 1-7, choose A, B, C or D to complete each statement correctly. Then translate the first two paragraphs into Russian.

Alexander Graham Bell

The telephone is now an integral part of modern life, yet it is still less than 150 years old. On March 7th, 1876, the United States Patent Office granted the patent for the telephone to Alexander Graham Bell. This was possibly the most valuable patent ever issued and more than 600 law suits would challenge the decision over the next seventeen years, **1)**

Others had also been working to invent such a device, among them Antonio Meucci. He had been ready to patent his 'teletrofono' in 1871 **2)** In 2002, the US Congress recognised that it was Meucci who had been first with the idea, a statement that continues to provoke argument.

Alexander Graham Bell was born in Edinburgh, Scotland in 1847, into a family of well-known elocutionists. He and his two brothers were largely taught at home as they were expected to enter the same profession. Sadly, by 1870, both his brothers had died from tuberculosis, **3)**

Frans Lanting travels to the ends of the Earth – and everyone who sees his pictures wants to follow him. James Owen talks to the world's greatest travel and wildlife photographer.

SuperGame

Whose words are they?

“If the human race is to continue for another million years, we will have to boldly go where no one has gone before...”

Professor Stephen Hawking

A person is seen from behind, sitting in a white canoe on a calm body of water at night. The sky is a deep, vibrant blue, filled with numerous stars of various colors and sizes. A bright shooting star streaks across the upper right portion of the sky. The water reflects the light from the stars and the sky. In the foreground, there are some mangrove-like plants on the left and a large rock on the right. The overall scene is peaceful and magical.
