Su

The Sungir is the northernmost Homo sapiens's settlement in Russia, which is situated in the Vladimir region. It has been found by archaeologists in 1955. There were many interesting finds.

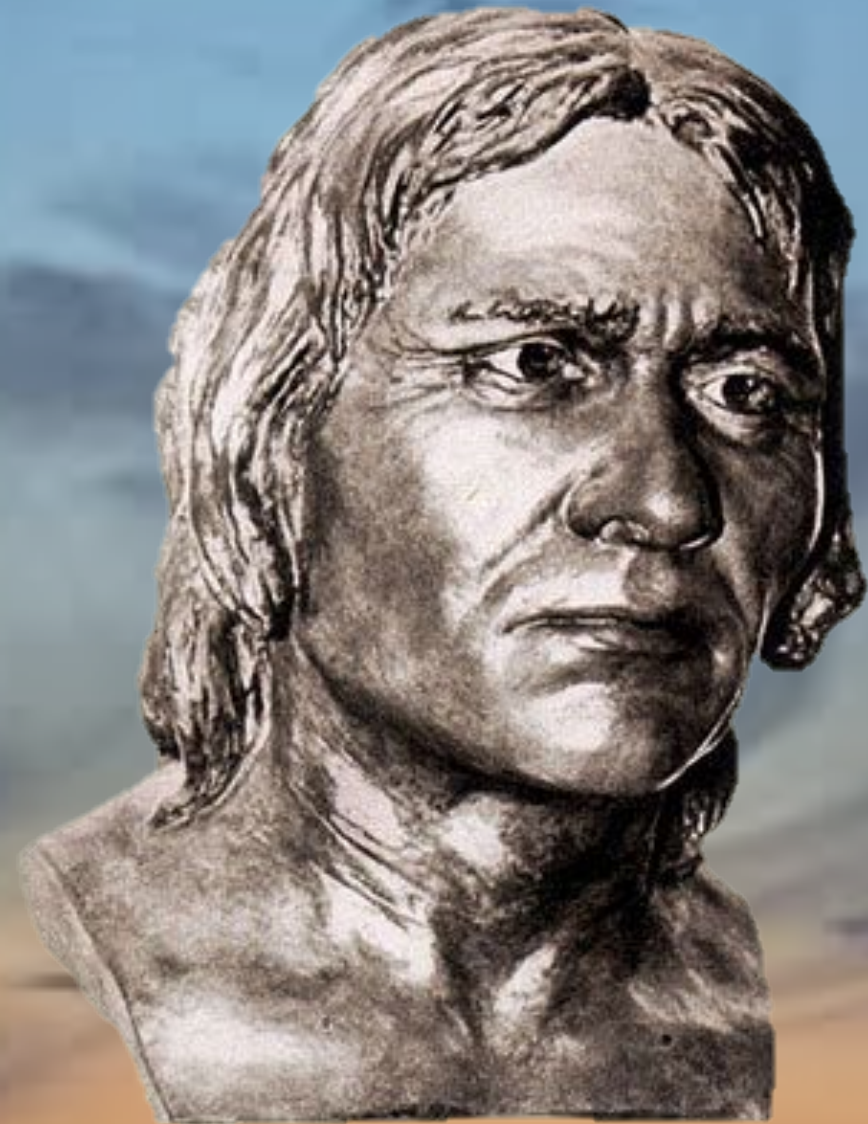

People, who lived there, were nearly 178 centimeters tall. They hunted mammoths, horses, wolves.

Cro-Magnons

In postglacial Mesolithic era of the European part of Russia is inhabited by the CRO-magnons swiderian culture, the descendants of whom were the Nations Butovsky (VIII—VI centuries BC) and upper Volga culture (VI—III thousand BC).

Swiderian culture was on the territory of Central and Eastern Europe.

The Butovo culture tribes led a nomadic life, hunting with bow and arrow.

The main occupation of the Upper Volga cultures were hunting and harpoon fisheries. Their dwellings according to type of tents.
