

My ideal place to live

In my opinion Spain is the ideal place in the world.

It's the country of the brightest sun, the clearest waters of the Atlantic ocean.

Spain is the only place in the world where palm trees grow.

I would like to live in one of the ancient cities like Madrid or Barcelona.

Spaniards are beautiful, cheerful and friendly people.

I like Spanish carnivals, traditional music and dances.

Every part of this country is different from other parts.
