Presentation on:

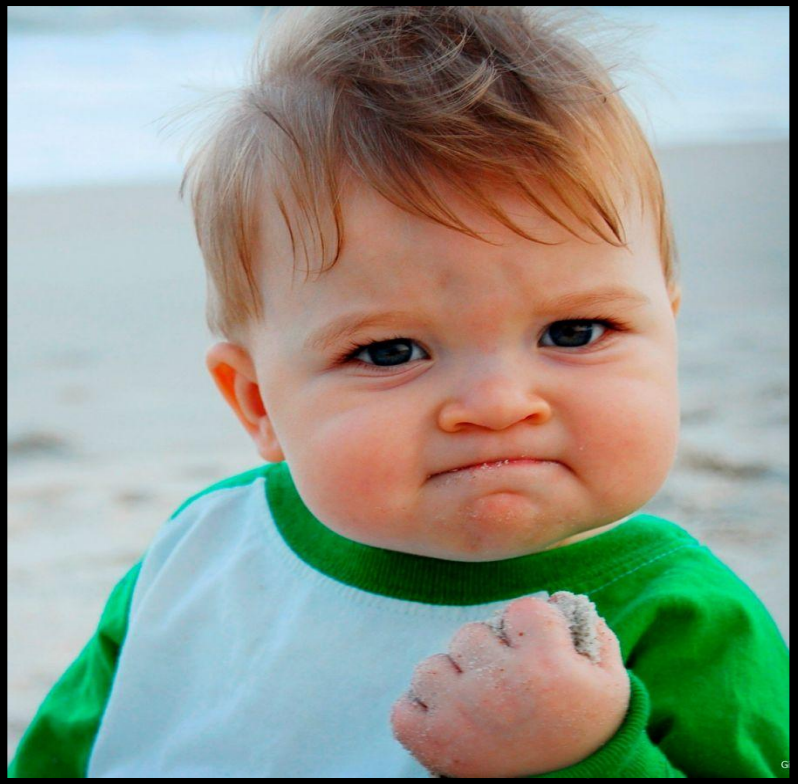
«CAREER STEPS»

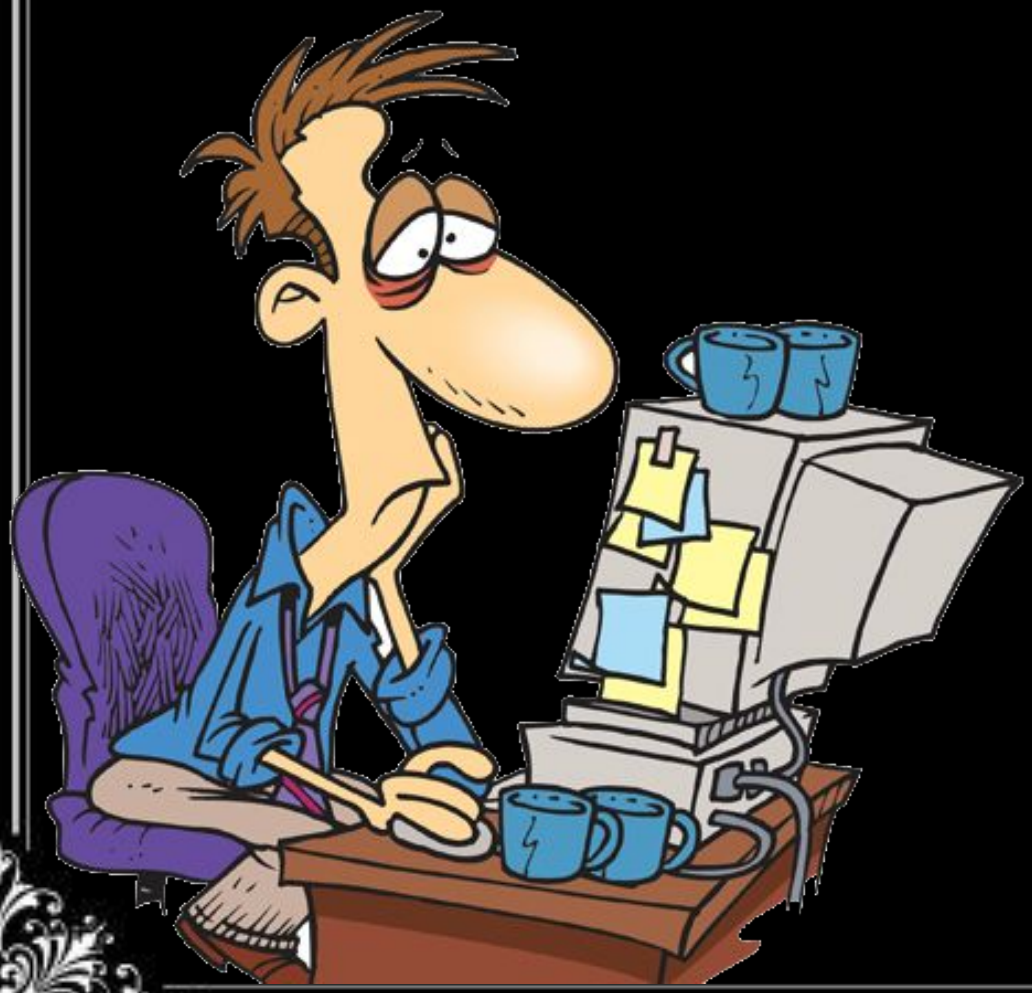
The choice of future profession is a very important step in the life of every person.

All people want to build a great career.

From a young age we often thought about what we want to be when we grow up.

We had childhood dreams.





As adults we understand that it is necessary to put a lot of effort to achieve your dreams.

SINCE CHILDHOOD I DREAM OF BECOMING A DOCTOR.

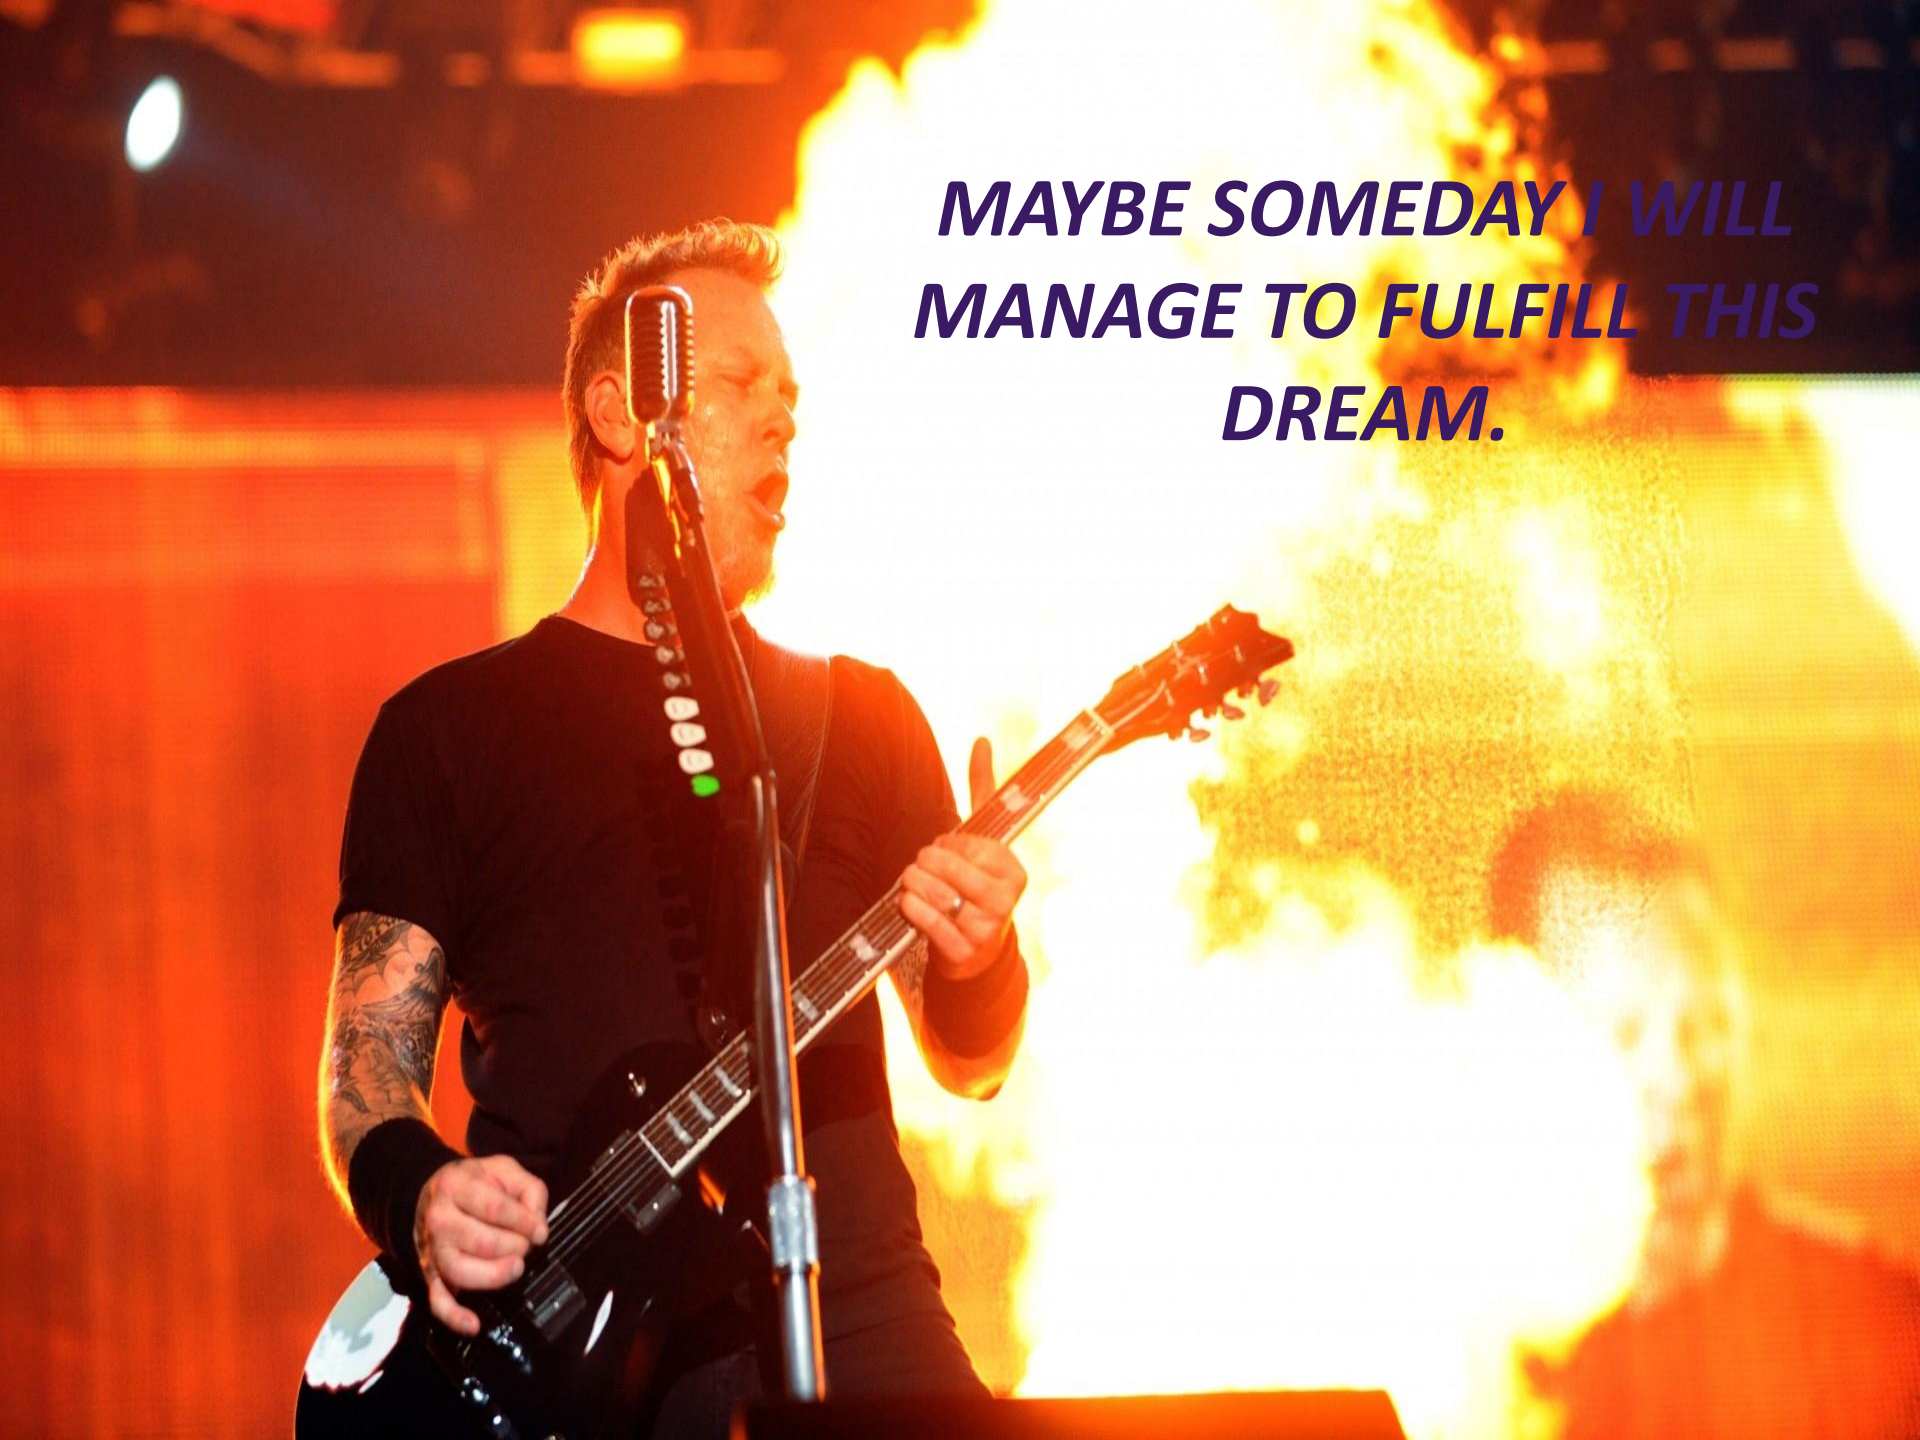
In order to build a career as a successful doctor ,I need to go to a medical university and successfully complete it.

Then you need to get a job and gain experience.

Yes , it’s not easy but I can handle!!!

If I had two lives , then I would have built a career as a professional musician.

I would improve and achieve great success in this field of activity.



MAYBE SOMEDAY I WILL MANAGE TO FULFILL THIS DREAM.

THANKS FOR ATTENTION!!!
