

Gyroscope

A decorative graphic consisting of a solid teal horizontal bar at the top, followed by a white horizontal bar below it. On the right side of the white bar, there are several thin, overlapping horizontal lines in shades of teal and white, creating a layered, modern look.

Spin axis

Gimbal

Rotor

Gyroscope- is a device used for measuring or maintaining orientation and angular velocity.

It can rotate around three axes: the main one, around which it rotates, and the other two

The gyro rotor rotates at a constant speed of 22000 rpm, which is supported centrifugal regulator

gyroscopes are laser and
mechanical

consists of a ring laser having two independent counter-propagating resonant modes over the same path

- laser gyro

Gyro Saves fixed ground position
