Scotland's National Nature Reserves

The archipelago of St Kilda, the remotest part of the British Isles, lies 41 miles (66 kilometres) west of Benbecula in Scotland's Outer Hebrides.

puffins

seagulls

St Kilda is home to about one million breeding seabirds, which come to the islands each spring to breed and raise their young.

Loch Lomond is a freshwater Scottish lake. The Loch is now part of the Loch Lomond and The Trossachs National Park which was established in 2002.

The Insh Marshes covers 10 square kilometres of the River Spey floodplain between Kingussie and Kincaig

Insh Marshes National Nature Reserve is one of the most important wetlands in Europe.
