# Endangered animals

# Polar bear

Population: There are 20000 polar bears left on the Earth.

# LIONS

Population:  
4500 species are  
living in  
the world.

# Big Panda

**Population:** There are 2000 giant panda live  
In their natural habitat.

# Mountain gorilla

- Population:
- There are just 800 species are left in the world.

Unbalanced  
Population:  
Only 5000-7000  
species are living  
in the world now.

## LEOPARDS

# BLACK RHINO

Population:  
4000 species  
are left in the  
world.

# The main problems

1. Poaching

2. Destroying habitats

3. Pollution of the  
environment

# Poaching

Poaching is when people illegally kill animals for their horn, fur, skin and meat.

# Introduced species

white tiger

When people introduce an animal into a new place the animal often suffers.

Native animals often can't compete with new species and become extinct.

# Habitat loss

- Humans have destroyed over half of the Earth's forests.
- As a result animals have lost the space, where they used to live.
- It is the biggest threat to wildlife today.

# Pollution

**Pollution from oil, gas, can harm animals.**

# THE GREAT PACIFIC GARBAGE PATCH

# Global warming

It is one of the biggest threat to wildlife.

# Farms

Farms also cause a lot of habitat loss.

They take up land for cattle and crops.

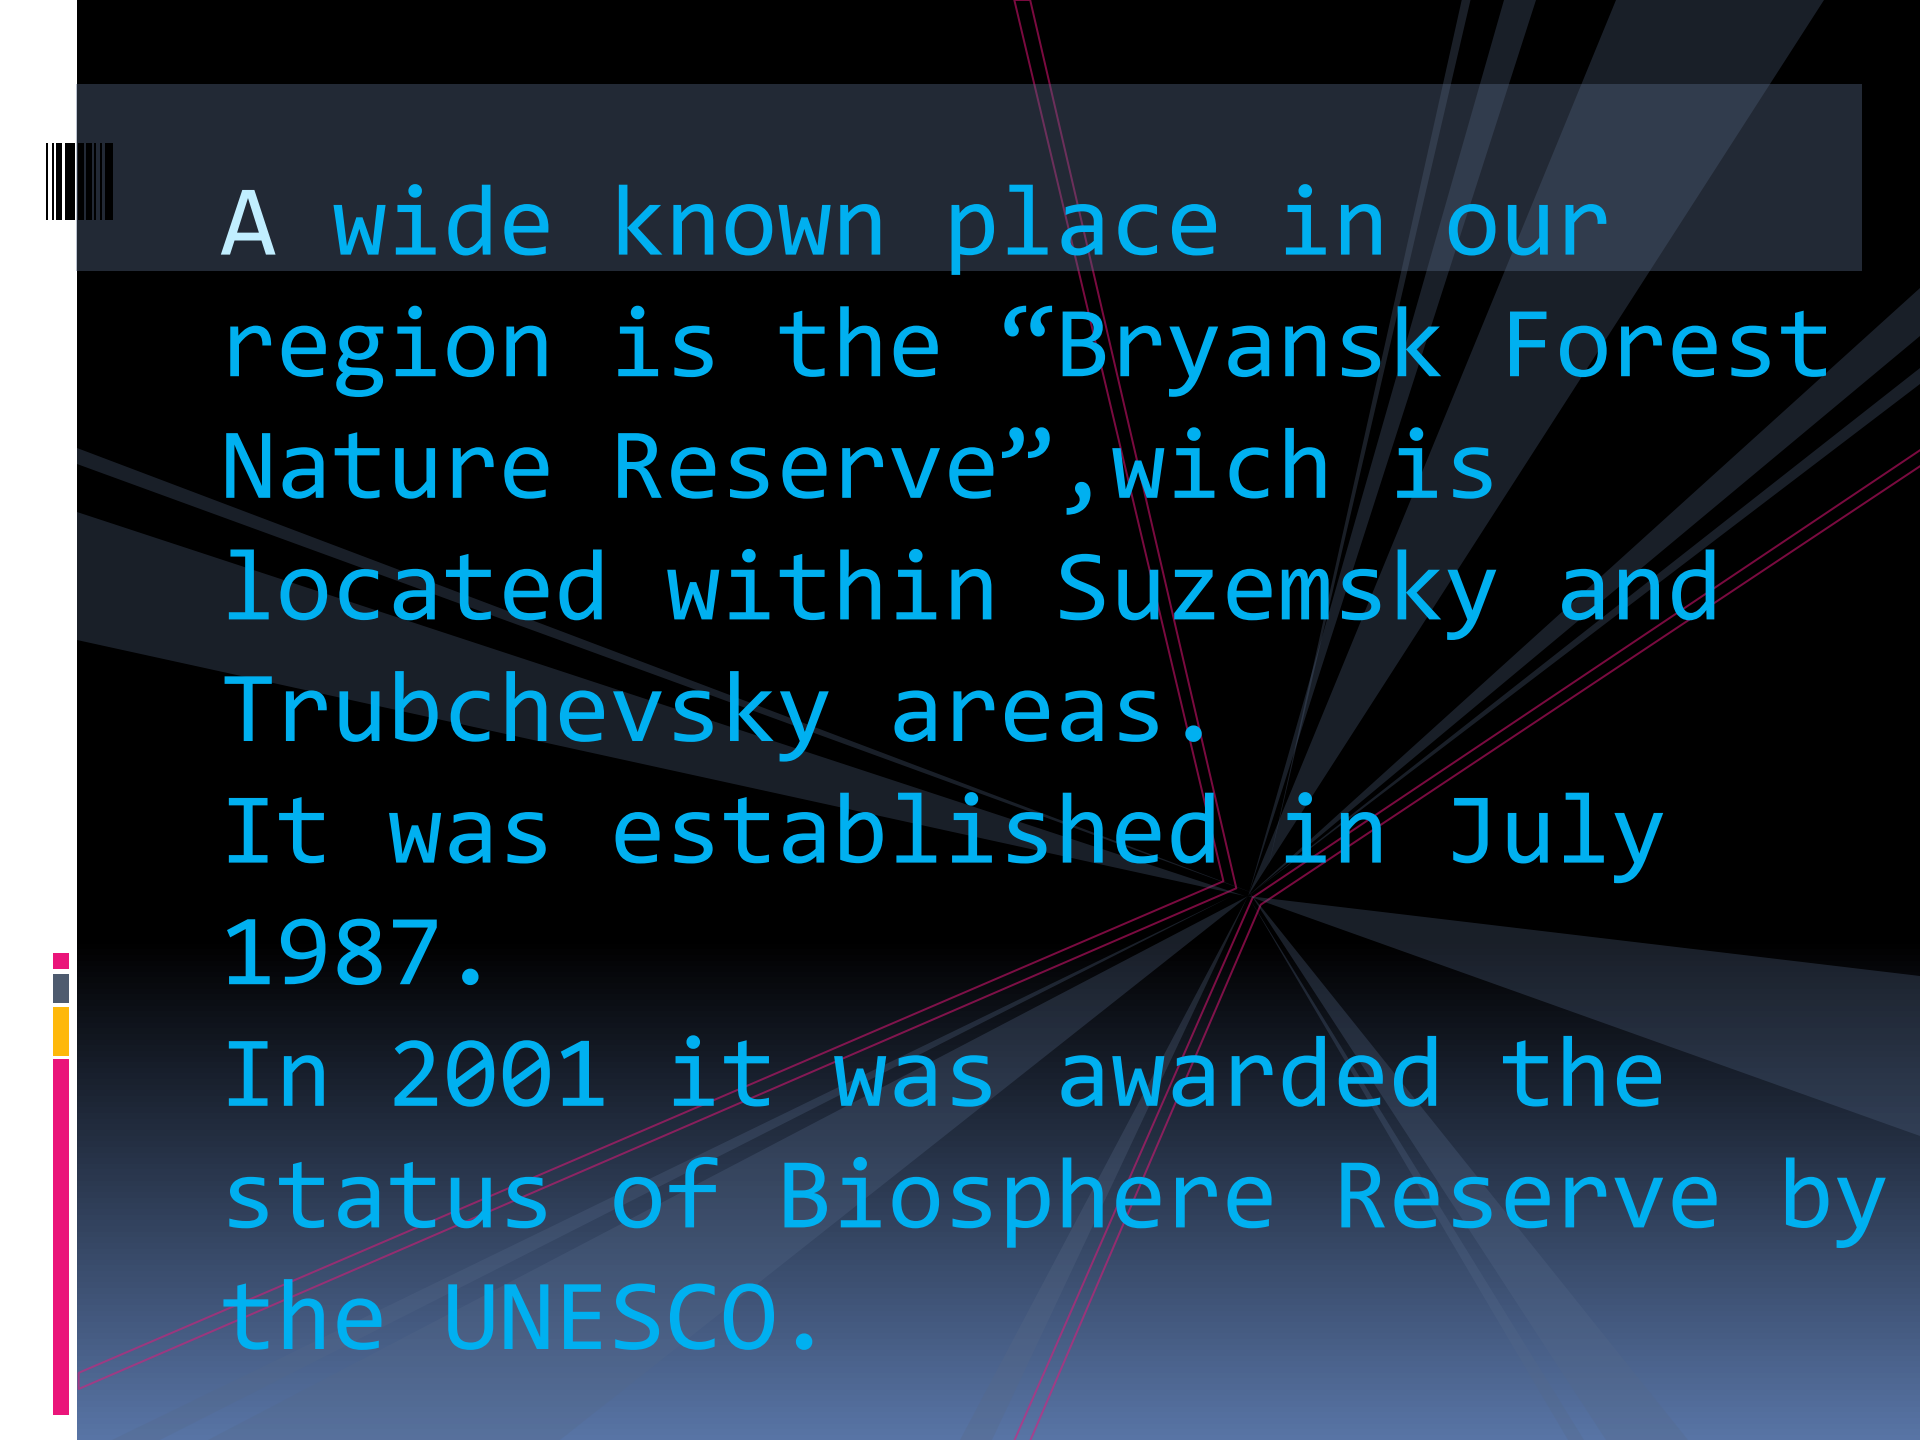

**HOW DO WE TAKE CARE FOR THE  
WILD LIFE IN BRYANSK  
REGION?**

# Our region is rich in forests.

There are many forest managements here. One of them is in POLUZJE. The huntmen are responsible for natural system. It means their task is to protect wild life.

A wide known place in our region is the “Bryansk Forest Nature Reserve”, which is located within Suzemsky and Trubchevsky areas.

It was established in July 1987.

In 2001 it was awarded the status of Biosphere Reserve by the UNESCO.

# Our appeal

- Don't pollute environment !
- Don't kill animals for profit!
- Don't destroy forests!
- Keep wild animals in national parks!
- Treat animals with love!
- Take part in actions against, poaching animals!

# Keeping pets

Dogs, cats, hamsters, rats, parrots, fish,

guinea pigs are considered to make good pets

and are still favourite ones, because

they are rather easy to look after,

quite cheap to keep,

and they **get attached to** their masters indeed.

I have had a dog since I was 10. I found it in the yard and brought it home. I was absolutely happy because my parents allowed me to keep it.

It is a **simple mongrel** ['mʌŋgr(ə)l] and we **call** it Jack. It is neither big nor small, coal black and incredibly funny and cute. When it was a puppy it **used to be** bouncy and noisy, but now it **behaves like** an adult: it is serious and calm.

WE ARE IN ANSWER  
FOR THOSE WHO  
WE  
TAMED

# Help homeless animals.

There are many homeless animals in our country, but we don't pay attention to them. Walking through the streets, we see the poor cats and dogs.

These animals were thrown away from their houses. But animals need our love and care.

The stray animals can be dangerous for people. Besides, there are animals which were born in the street, they also deserve to live. Let's help homeless animals!!!

Different countries have shelters. The owners organize donation. In such way they save homeless animals

If you've bought it and you don't know how to get rid of it, it's better to advertise or give it to a shelter.

We must help homeless animals in various way. We can organize demonstrations and actions to encourage to think about the lives of our smaller brothers.

Elisevichy-boarding home for  
dogs.

# Appealing!

Help homeless animals!

Treat them with love!

Never throw away your pet!

We are glad to have home!

# Survey: "We and animals".

1. Have you got a pet?
2. Do you care for it?
3. Do you feed stray cats and dogs?
4. Would you like to be a volunteer in a shelter for animals?
5. Did you used to get rid of a pet?
6. Is hunting animals for the real men?
7. Do you support pouching?
8. Would you like to join the action against cruelty to animals?

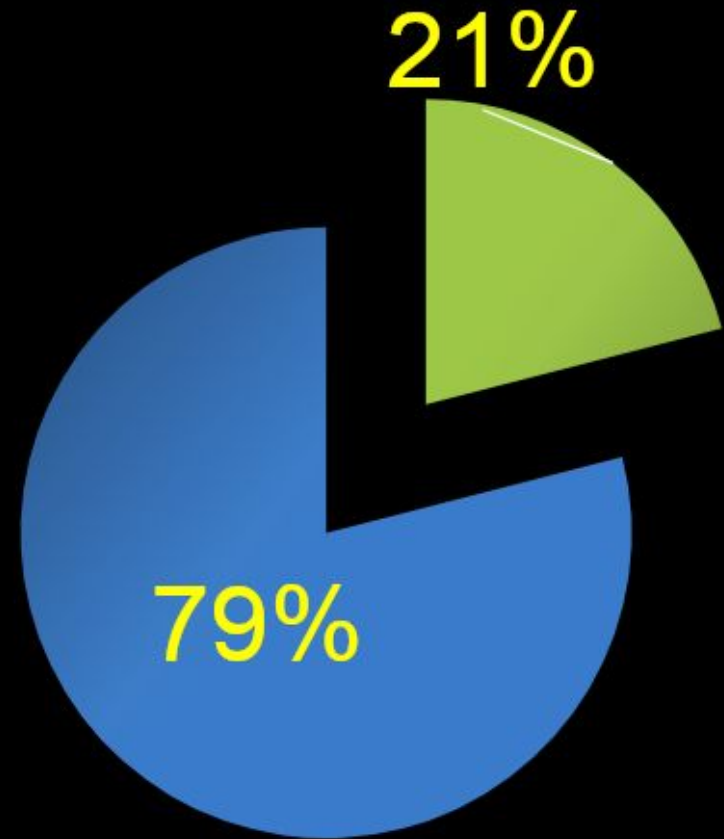

## RESULT OF THE SURVEY

The number of participants:  
35 pupils.

21%- negative  
to animals.

79%- positive.

THANK YOU FOR YOUR  
ATTENTION!!!

ОНИ НАШЛИ ОБЩИЙ ЯЗЫК  
в отличие от людей
