There are a lot of things in Russia which can be chosen the best items of Russia.

The most famous and significant item of our country is the Hermitage in St.Petersburg.

**It is one of the world`s greatest museums. It is packed with millions of paintings, sculptures and other exhibits from the world.**

The museum is exciting to watch and that is why tickets are always very difficult to get.

I think that Russian Fur-Coat can be the icon of Russia. It is bought by millions of people. It gives a sense of comfort. Russian Fur-Coats are warm to wear in cold Russian winter.

I`d like to vote for rational Russian dish borsch. For many people it is the most useful and tasty food. It is made of a lot of vegetables and it is eaten with sour cream. It is impossible to imagine lunch in Russian family without borsch.

**Thank you for attention!**
