Conclusion

When people call this beast to mind

They marvel more and more

At such a little tail behind

So large a thank before

Where do tigers come from?

Do people threaten some
animals?

“50 years ago there were 40 000 tigers in the East and now there’s only 8 000 to 10 000.”

What can you say about this?

A stylized illustration of a tiger with orange fur and black stripes, walking through tall, brown grass. The background is a light green and yellowish landscape with some darker green foliage. The tiger is positioned in the lower half of the frame, moving from left to right. The overall style is flat and graphic.

Will they disappear some day?

Do you know that...

There used to be 300 species of elephants, today you can find them in Africa and India. Especially Asian and Indian elephants are in danger. Hunters have been killing elephants for meat and their ivory tusks for a long time.

Today many elephants in Africa are dying because they do not have enough food to eat and space to live. Today only 1 million elephants live on the planet. Some day they may disappear.

Before the war time tigers had enough space to live. Today tropical forests became less and less. People have been hunting tigers since the war. They may disappear, too.

People hunt the blue whale for meat, fat and oil.

Thirty years ago there were 100 000 rhinos in Africa. Today there are probably less than 4 000. In Kenya, Zambia rhino horn is a fortune.
