There is an exceptional monument in Voronezh. This is the legendary Rotunda.

A word “Rotunda” is Italian.

It comes from the Latin word
“rotundus” that means
“circular”.

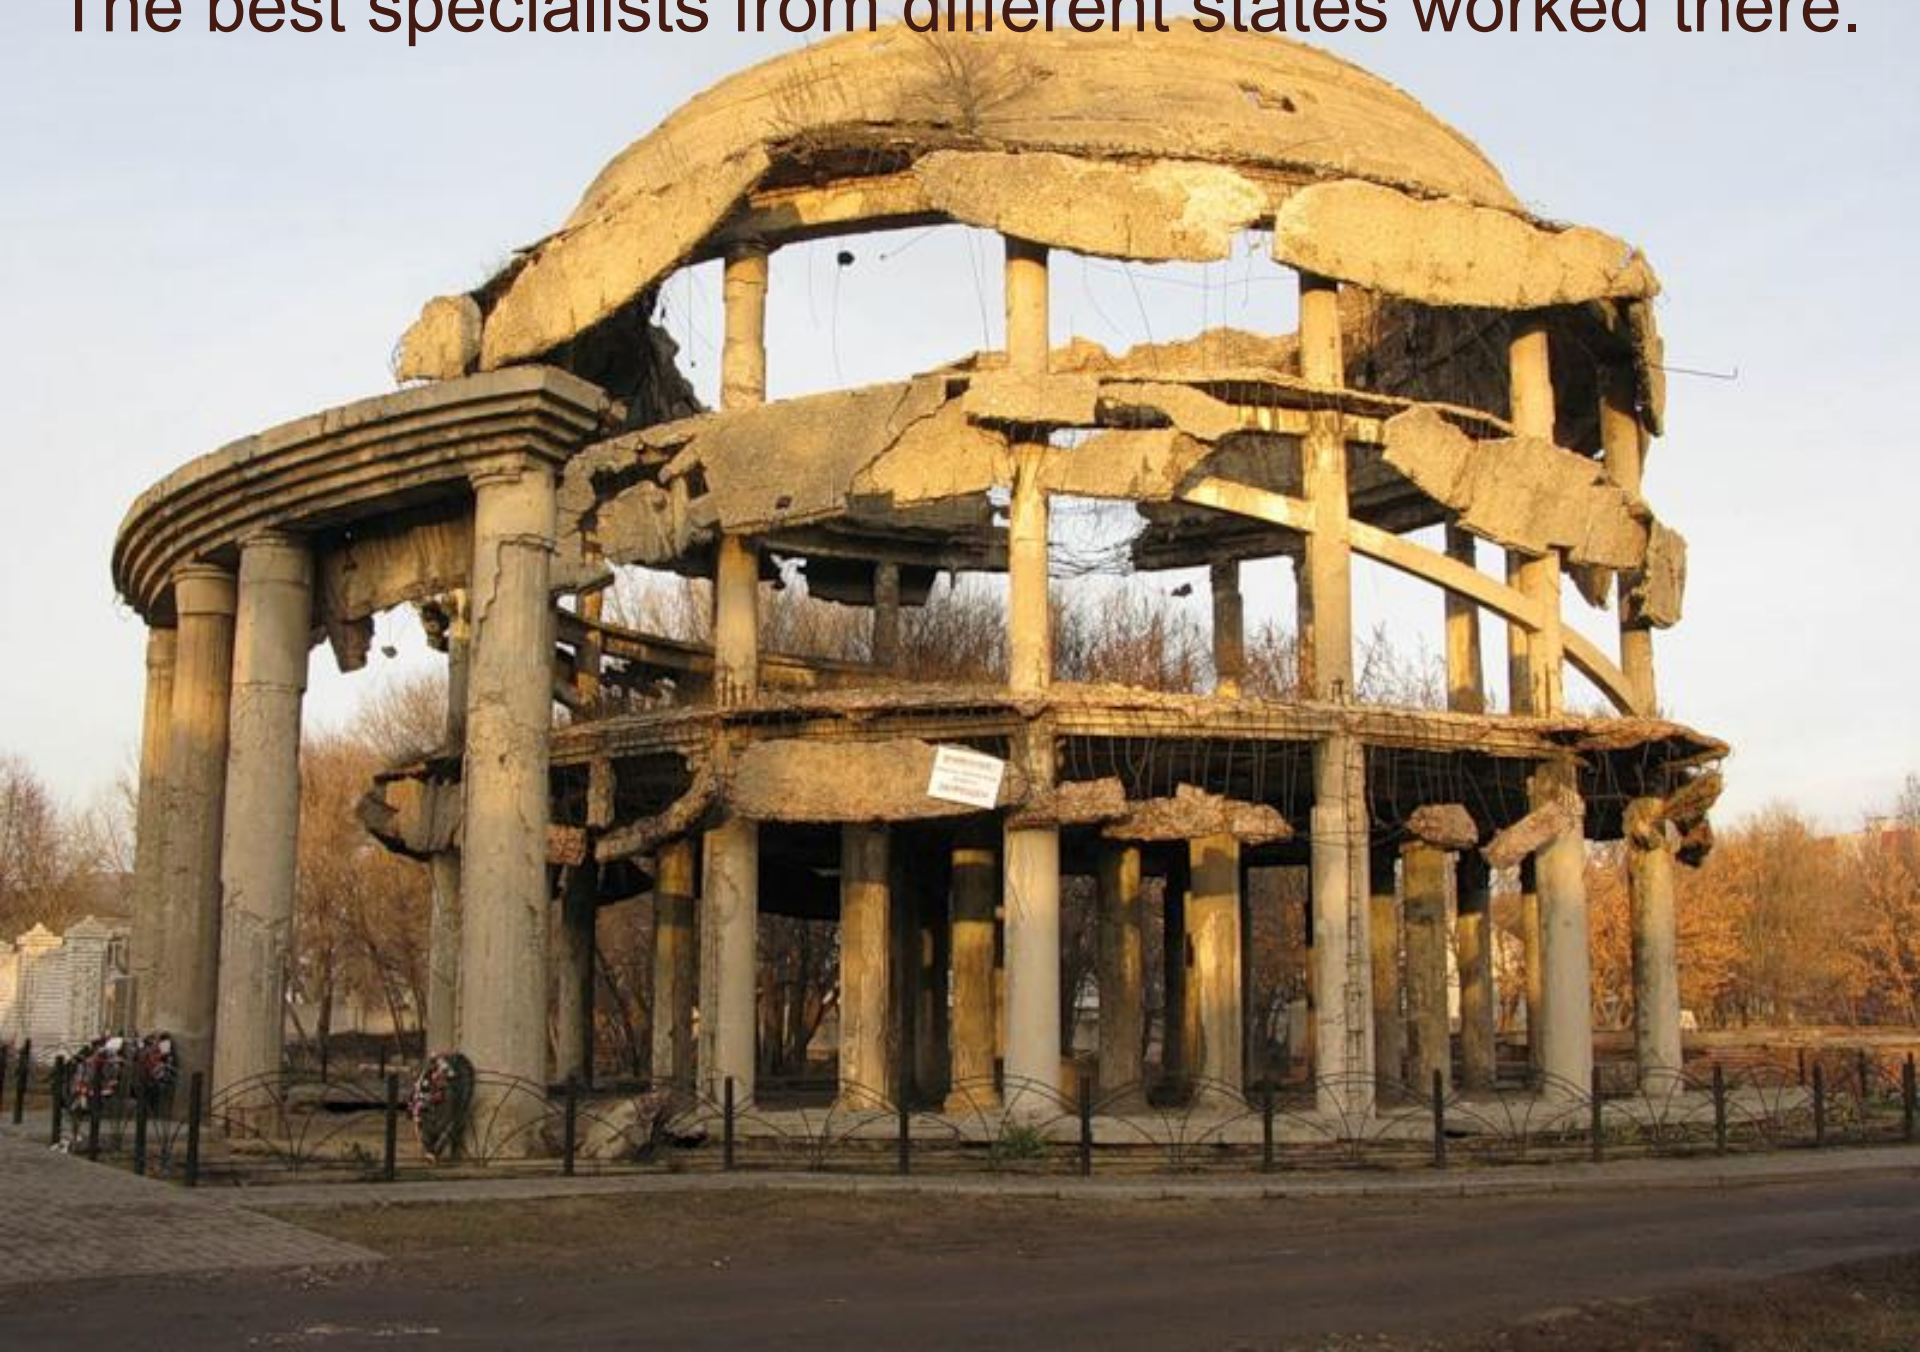

The Temples of ancient Greece and Rome, some Christian Churches of Revival were built like Rotunda in circular form.

The portal of the huge regional hospital for children in Voronezh also has this exceptional and great form.

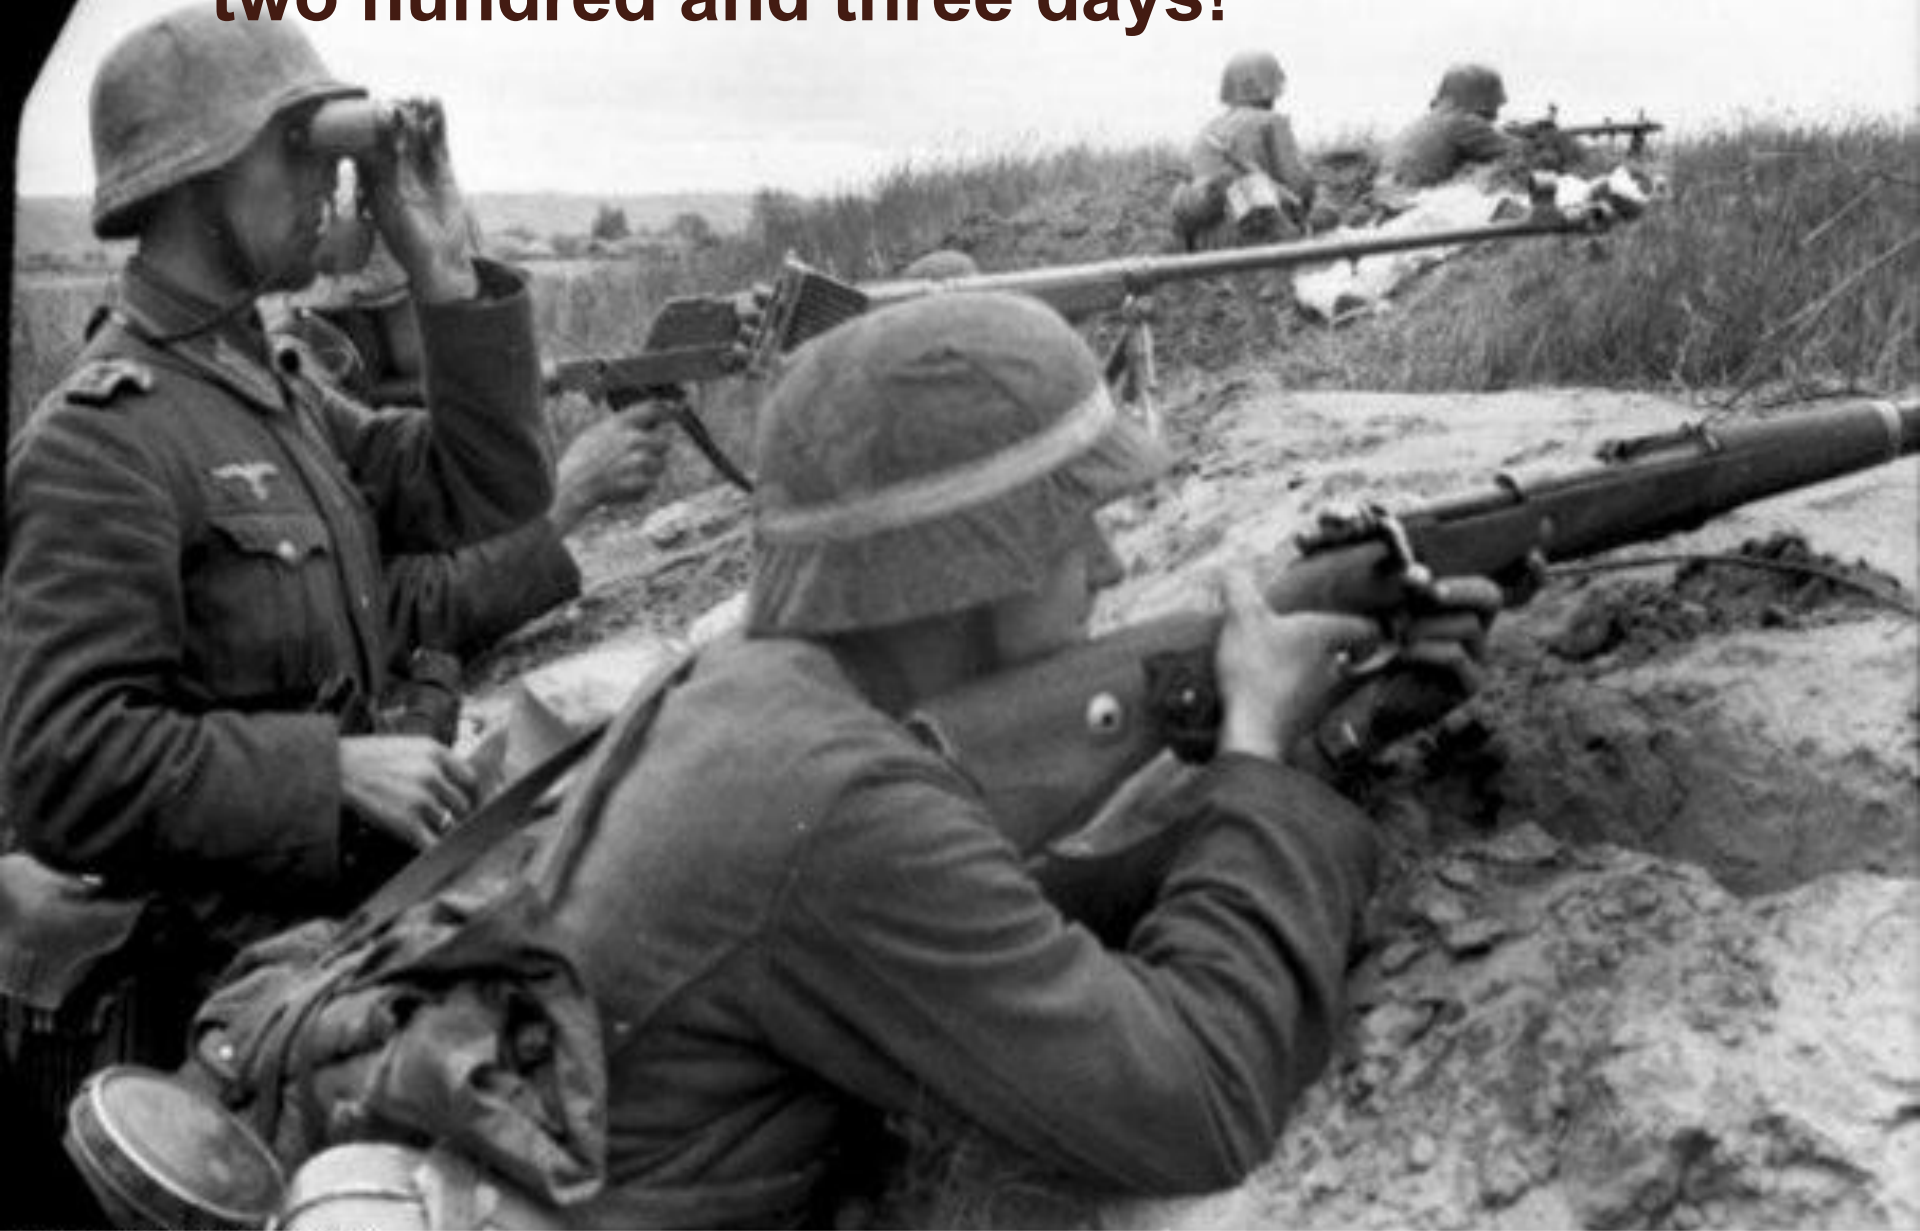

The best specialists from different states worked there.

The battles near the hospital continued nearly two hundred and three days!

Our town was destroyed after those battles.

**Only the dome of the wonderful regional hospital remained.
But it had a huge hole.**

In 1965 this building became the memorial of the Second World War.

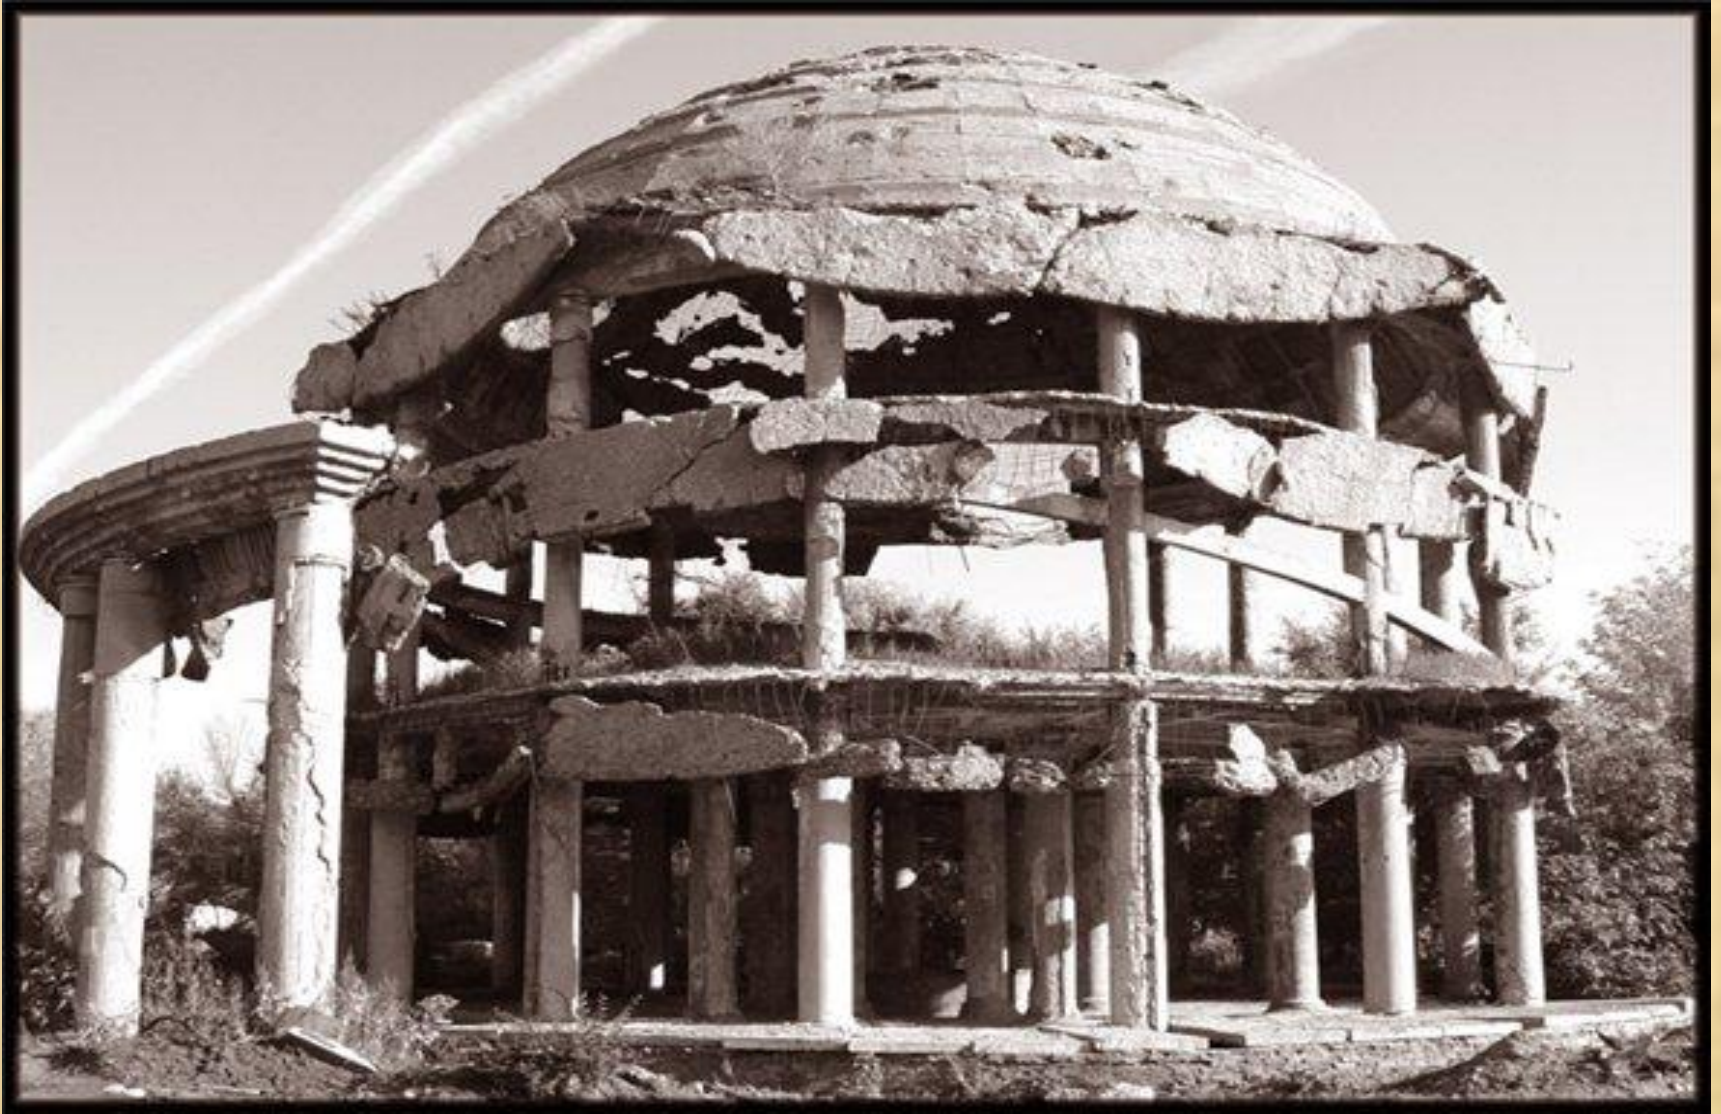

The Rotunda stands in a beautiful place, on Burdenko Street, near the new hospital. And soon the Vladimir Temple was built not far from the old hospital .

The Russian
specialists wanted
to restore the
Rotunda, but...

Over 65 years, after the liberation of Voronezh from the fascists, at night of the twenty third of February in 2008, the dome of the Rotunda fell... And nobody doesn't know about the destiny of this great monument...

THANK YOU!
