

To begin with, I
only want to ask
a question...

Where would you
like to live?

When the fields are
green ...

In the open air...

A number of cristale water is nearby

It is beautiful,
isn't it

And what about such a field ?

And the air is not fresh...

The water is not fresh...

According to statistics : 7 million deaths each year are linked with air pollution

Water pollution

Water resources is one of the main factor of existing life in our planet.

People use fresh water for their needs. It is more than 2% of hydrosphere volume.

First of all water pollution is the result of industrial, agricultural and everyday necessities discharge of wastes into rivers, lakes and seas.

The main part of water pollution plays a large number of oil industry wastes.

Water pollution

Water pollution is caused by dumping wastes into lakes, rivers, and other bodies of water. Harmful wastes may also get into the soil or drain off fields that have been sprayed with pesticides. Pesticides are often used to kill insects and weeds in cities or on farms. Polluted water can spread many diseases.

" We have a responsibility to life, to defend it everywhere, not only against our own sins, but also against those of others. We are all passengers together in this fragile and glorious world ".

Professor A. Hertzberg.

The choice is
you

THE END
