

Red Data Book of the Russian Federation

This presentation was made by Lavrenovich
Anastasia, 8th form.

Red Data Book of the Russian Federation

Red Data Book of the Russian Federation (RDBRF), also known as Red Book ([Russian](#): Красная книга) or Russian Red Data Book is a state document established for documenting rare and [endangered species](#) of [animals](#), [plants](#) and [fungi](#), aswell as some local [subspecies](#) (such as the [Ladoga seal](#)) that exist within the territory of the [Russian Federation](#) and [its continental shelf](#) and [marine economic zone](#).

Conservation

The book provides a central information source in organizing studies and monitoring programs on rare and endangered species and their habitats. It is regularly consulted when developing and implementing special measures for the protection and rehabilitation of such species.

The red color of this book means stop!

The pages of Red book

THE- ENDANGERED SPECIES

THE LITTLE EXPLORED SPECIES

RECOVERING SPECIES

UNKNOWN SPECIES

RARE SPECIES

10 most rarest animals

1. Red wolf
