

# Presentation on a subject: the Voronezh national natural biosphere reserve

**DAVYDOVA TANYA; POLYUSHENKO ALINA**

# Location

- The reserve is in the settlement Krasnolesny ( the Count station). Today he is a part of Voronezh. The reserve is in 40 kilometers from the city.

## Famous for...

The Voronezh reserve has been created for preservation of an endangered species of animals – a river beaver

## What you can see there...

Here live 217 bird species, 60 mammal, 39 type of fish. More than 100 species of plants grow here. In the territory of the reserve there is a monastery and museum.

# The best time to visit

- The best time for visit of this reserve is a summer. Around there are green grass, flowers, the sun. In the summer here it is really possible to have a rest soul and body.

# Reserve purposes:

- ◆ **IMPLEMENTATION OF PROTECTION OF NATURAL TERRITORIES FOR PRESERVATION OF BIOLOGICAL DIVERSITY AND MAINTENANCE IN NATURAL STATE OF THE PROTECTED NATURAL COMPLEXES AND OBJECTS**
