

Stress and How to Cope Well with It..

Anastasia
Zhivogina

**A definition, friends, of stress :
Your own reaction to a mess.
Stress from pains to pleasures range,
The common element is change.
Adapt or die and that is a fact ,
And so our bodies must react:
The heart speeds up the gut slows
down,
Facial muscles snarl or frown
The point is stress is not unique,
It does not mean you are dumb or
weak.
Common both to man and beast,
It proves you are still alive at least!**

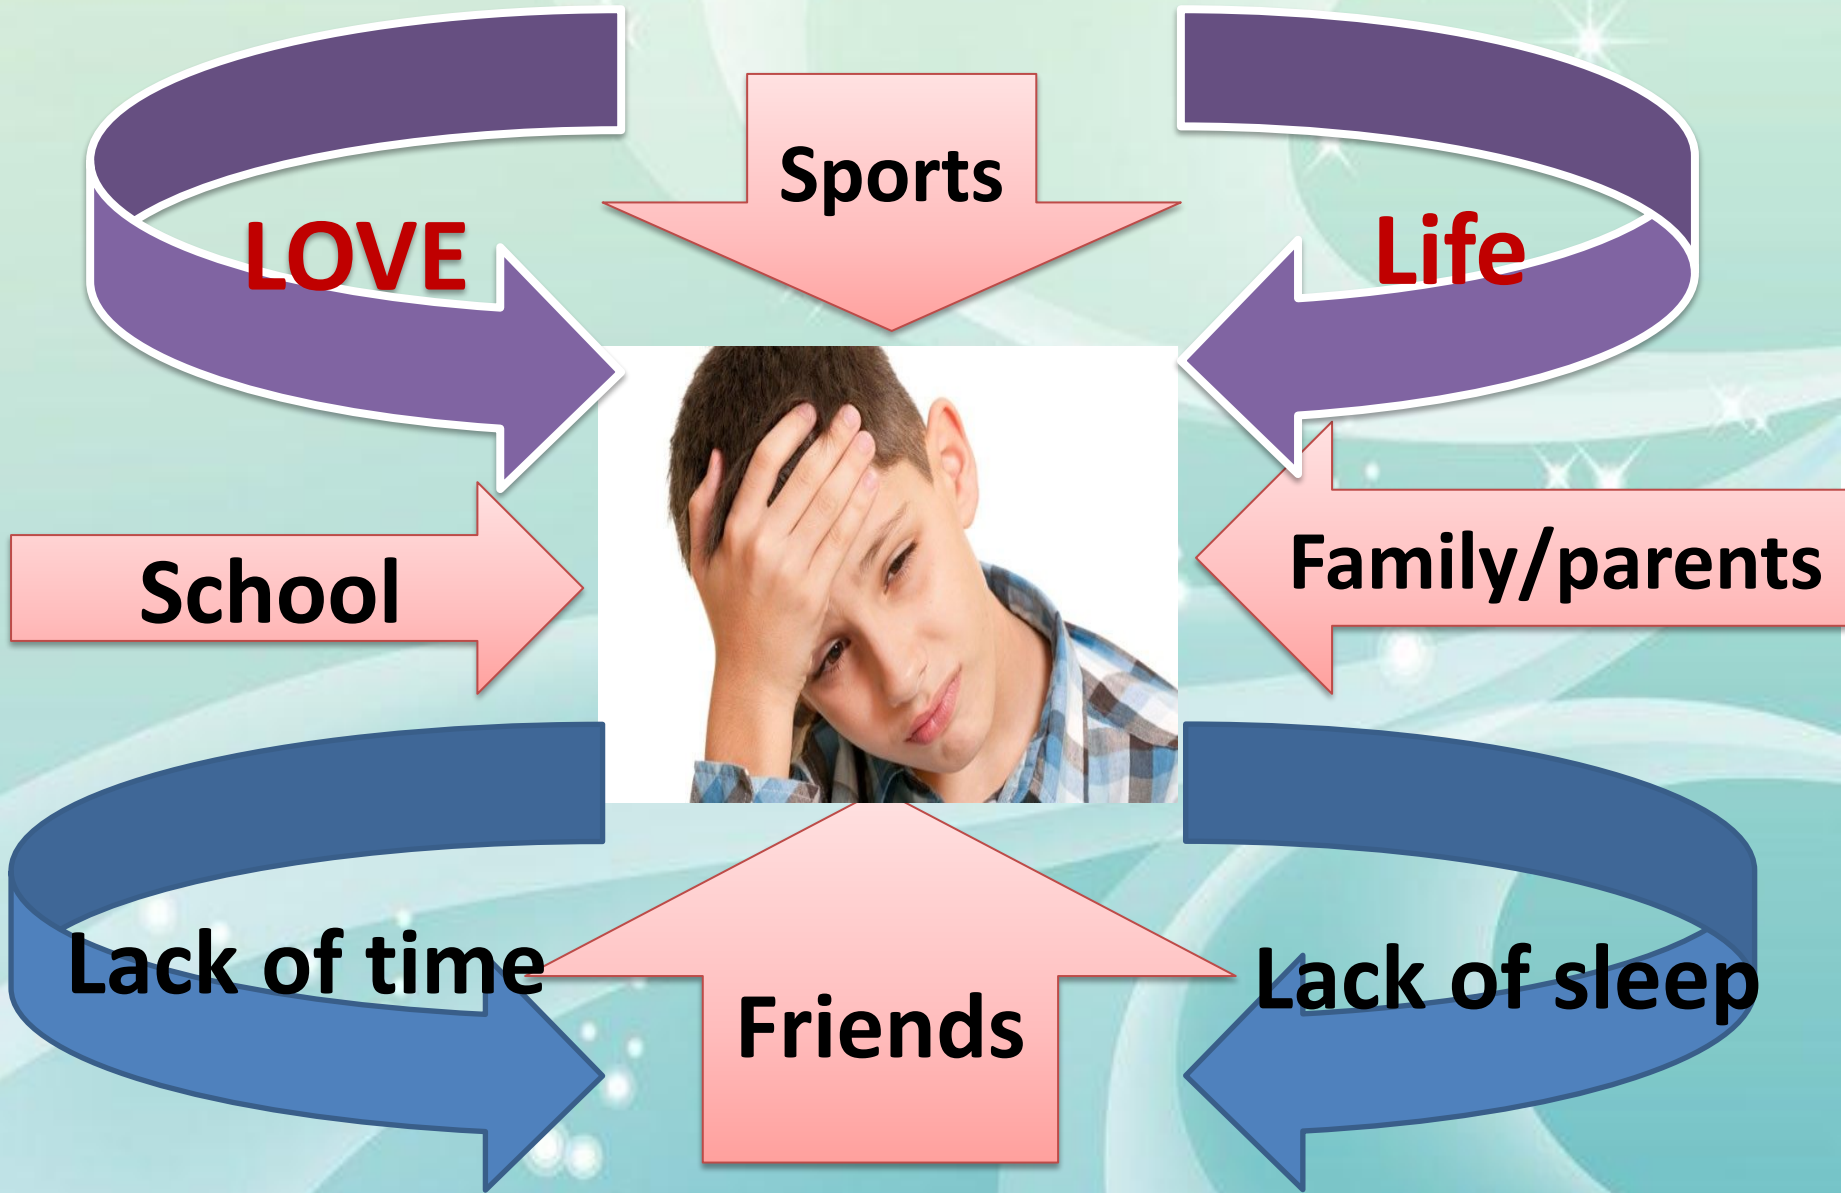

What is stress???

-is a natural reaction of our body to life's changes;

-is the way our bodies cope with the environment

great worry caused
by a difficult
situation or
something
that causes this
condition

A yellow sticky note is affixed to a pink, textured wall with a piece of clear tape at the top center. The note contains the handwritten text "don't forget to smile" in red ink, arranged in three lines. The note is slightly tilted and casts a soft shadow on the wall below it.

don't
forget to
smile
