

# The River Thames

An aerial photograph of the River Thames in London, England. The river flows through the center of the city, with a large green park area on the right bank. The city skyline is visible in the background, and several boats are on the water. The text "The River Thames" is overlaid in large white letters.

London would not be London without the River Thames. It flows 215 miles across the English countryside and then through the heart of the great city before it reaches the sea. The Thames has played an extremely important part in making England what it is today.

Today there are thirty-four bridges. The most famous is near the Tower of London. The river helped London in many ways. The water is clean and fish swim in the Thames.

# River Thames boat trip

- 
- ***Welcome, ladies and gentlemen, to the River Thames boat trip...***
  - ***On the left you can see...***
  - ***Now we're just passing***
  - ***We're coming up on...***
  - ***On the right, you can now see....***

Good for you
