*It may sound funny to you, but man needs protection and care as much as animals do. People's habitats - their homes towns and cities - must be kept ecologically clean. In the places where people drink poisoned water, eat bad food and breath polluted air they suffer from serious diseases and die earlier; their children are born weak. No medicines prescribed by the doctors can help them. This problem becomes more and more serious with every passing day. The modern way of life when people have little physical activity, use cars instead of walking, watch TV for many hours and work on computers is turning them into legless creatures.*
