

My profession is an
electrician

- ① My future specialty is a work with electric equipment application. I have chosen this specialty not only because of deficiency in the engineers of this structure, but also because of my interest.
- ① However the Electricity brings not only advantage, but can and harm the illiterate person.
It will serve us smoothly if we use it reasonably.
After all the electricity brings set of new possibilities in our houses, facilitating us life.
We use electric devices constantly.

- Our life today is impossible without electricity. Computers, domestic appliances, factory machines, medical equipment, electric trains, telephone communication and all kinds of gadgets will not run if there is a power failure. There must be somebody to fix it and this person must know what to do and how to do it properly. This is what electricians do: they install, maintain and repair electrical systems and equipment.

- ◎ I have always been interested in electrics, and Physics and Mathematics were my favorite subjects at school, so I decided to become an electrician. Besides having basic knowledge in physics and mathematics I must study mechanics and drafting and be able to read wiring diagrams and drawings. As we know, electrical mistakes can lead to shortages, shocks, fires and costly repairs. So people who have chosen the profession of an electrician must have a good reaction, be cautious and extremely attentive.

- ◎ Another important aspect of this profession is being physically fit and strong: electricians often have to move heavy equipment or stand or kneel for long periods of time. It is also necessary to have keen eyesight, good hand-eye coordination and a good sense of balance. Every day electricians perform new tasks in new locations and with new people, so I think I will never get bored with this profession.

- ⦿ Electricity consumption in our country is increasing every year due to the development of technology and emergence of new equipment that needs professional maintenance. That is why the profession of an electrician is going to stay one of the most important in our world.

The task: read and translate the text. Answer the questions:

- 1) What possibilities does electricity bring to our house?
