WINTER IN RUSSIA

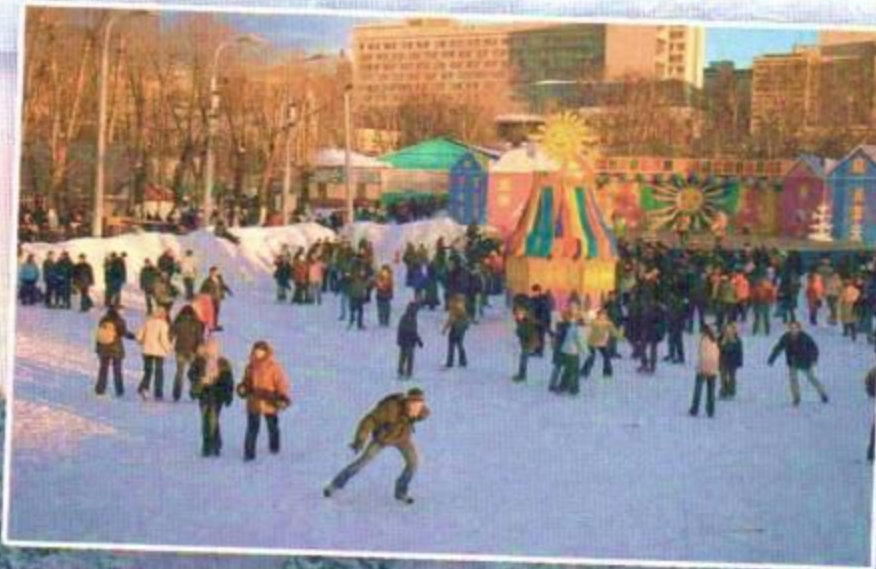

Many people in the world think that Russia is a big, snowy and very cold place – and in the winter, that isn't far from the truth. A Russian winter brings thick snow, frozen lakes and rivers and freezing cold weather. The 'pole of cold', the place with the coldest temperatures in the world, is Oymyakon, in Yakutia. There, in January, the temperature is -50°C , with a record temperature of -71.2°C in 1926. But Russia is very big and in Sochi, on the Black Sea coast, the average temperature in winter is about 6°C .

Traditionally, popular Russian winter sports are cross-country skiing and skating, but more people are now doing new sports such as snowboarding, or ice diving in the White Sea. Ice diving is very exciting – you can see strange and beautiful sea animals in the water under the ice.

Every winter in Murmansk there is a ten-day Festival of the North, a 'mini winter Olympics'. There's an ice hockey tournament, Russia's famous 50 kilometer skiing marathon and reindeer racing. It's fantastic. Don't miss it!

Big Ben ice sculpture in Moscow's Pushkin Square

1. Winter temperature in Russia is from + 6 C to - 70 C

2. Every winter there is "mini winter Olympics" in Murmansk

3. "Mini winter Olympics" are becoming more popular
