

The Earth Is Our Home

What does "ecology" mean?

- Ecology is a science about nature and about relation of man with it.
- Practically, it is a science studying whether we, human being, keep our common house, our planet Earth, in a good state and how we use the gifts it is giving us: water, air, land, plants, animals and minerals.
- Ecology is a science which studies the relationship between all forms of life on our planet with its environment.

What are the names of the environmental problems of today?

- Air pollution, smog, water pollution, destruction of natural resources.
- The ozone layer in the upper atmosphere protects the world from the sun's harmful rays. The chemical used widely in aerosol cans, refrigerators, and other products are destroying this precious layer.

The electric power station burn coal to produce the energy that keeps our light on. That burning coal gives off gas that came the greenhouse effect (парниковый эффект) and acid rains (кислотные дожди).

The Earth is our environment.

If we are not worried about the Earth, some ecological problems appear:

- Air and water are polluted
- Forests are cut down
- -Animals are damaged
- Wildlife is disturbed
- Litter is put into water
- Health is spoiled

Land, air, water are important for flowers, trees, animals, birds, fish and people.

But what's happening now?

Land

- The forests are cut down
- When the forests disappear many animals are disturbed
- Most of the countryside is spoiled

Water

- A lot of rivers and lakes are polluted
- Sea animals are hurt

Air

- Air pollution is not reduced
- Global warming is caused by the greenhouse effect

WHAT ARE THE RESULTS OF OUR INFLUENCE ON THE ENVIRONMENT?

- We pollute the air. We change the climate.
- We leave a fire. We destroyed the forest.
- We throw away plastic bottles. We damage nature.
- We leave litter in the forests. We hurt animals.
- We break trees. We disturb birds.
- We don't recycle paper. We cut down trees to make new paper.
- We throw litter in the rivers and seas. We cause water pollution.
- We leave glass bottles in the forest. We hurt animals and people.

22 April - Earth Day Do you know this holiday?

There are over 300 nature centers in British cities.

There are a lot of environment

groups: Friends of the Earth, Greenpeace and others.

What are these groups' concerns?

Greenpeace

"When the last tree is cut down and the last fish killed, the last river poisoned, then you will see that you can't eat money."

Friends of the Earth (the FOE)

It is an environmental pressure group. This organization was founded in the UK in 1971. The aim of the group is to protect the environment. The main concerns are air, sea, river and land pollution; recycling, etc. "Friends of the Earth" has branches in 30 countries.

The Royal Society for the

Protection of Birds

• The RSTB (The Royal Society for the Protection of Birds) is a voluntary organization in **Britain. It was** founded in 1889 with the aim of protecting wild birds. The society has over 200,000 members.

Look how beautiful can be our

The Earth is our home

Each of us must do everything possible to keep the land, air and water clean.

The Code of Ecological Rules for all pupils of our school.

- Don't break trees.
 - Don't leave litter.
 - Keep dogs under control.
 - Put litter away.
 - Keep your place tidy.
 - Grow trees and flowers.
 - Don't cut wild flowers.
 - Don't burn fires.

Your home task is to write a report

"How we can to keep the Earth clean"
