

Our planet is in danger!

# Forests in danger.

Forests have become very  
often burn them cut down...  
People who rest in the forest  
leave garbage leave the fires  
... We must protect our  
forests!

# Forest "before" and "after"

# Air pollution. =(

Air polluting factories, cars, it should. Also be noted forest fires that produce thick clouds of smoke enveloping the large areas, and dust storms.

# Forest "before" and "after"

# Water pollution. =(

The pollution of fresh water -  
passage of various pollutants  
in the water of rivers, lakes,  
groundwater.

# Forest "before" and "after"

# Soil pollution. =(

Soil - special natural formation, which possess a number of properties, inherent in the animate and inanimate nature, formed in the result of long-term transformation of the surface layers of the lithosphere under the joint.

# Forest "before" and "after"

We must protect our  
planet!

Thank you for your attention.  
=)
